WALSH'S HANDBOOK of ROSES

M. H. WALSH ROSE SPECIALIST
WOODS HOLE, MASS.

Foreword

TAKE pleasure in presenting my Catalogue for 1911, with descriptive price list of Roses, Hollyhocks, Phloxes and Peonies.

I respectfully call your attention to the novelties in the Wichuraiana Climbing and Rambler class, Lady Blanche, Lucile, Maid Marion and Troubadour, which are varieties of the highest merit, being hardy, vigorous growing and fragrant.

Meritorious varieties have been added to the list of Hybrid Teas or Everblooming Roses, which have become the favorite Roses of the garden.

The Hybrid Sweetbriars, known as Lord Penzance Sweetbriars, are deliciously fragrant, and the blooms in various colors are most charming. They are single and semi-double and are suitable for growing as a hedge, or trained as a climber. My collections of Hybrid Perpetuals or June garden Roses include the choicest and best in this class.

I would also call your attention to my Hollyhocks in choice colors, Herbaceous Peonies and Perennial Phloxes.

Extending my thanks for the patronage of the past and the many testimonials received, and soliciting the continuance of further orders, I am

Yours very respectfully,

Woods Hole, Massachusetts.

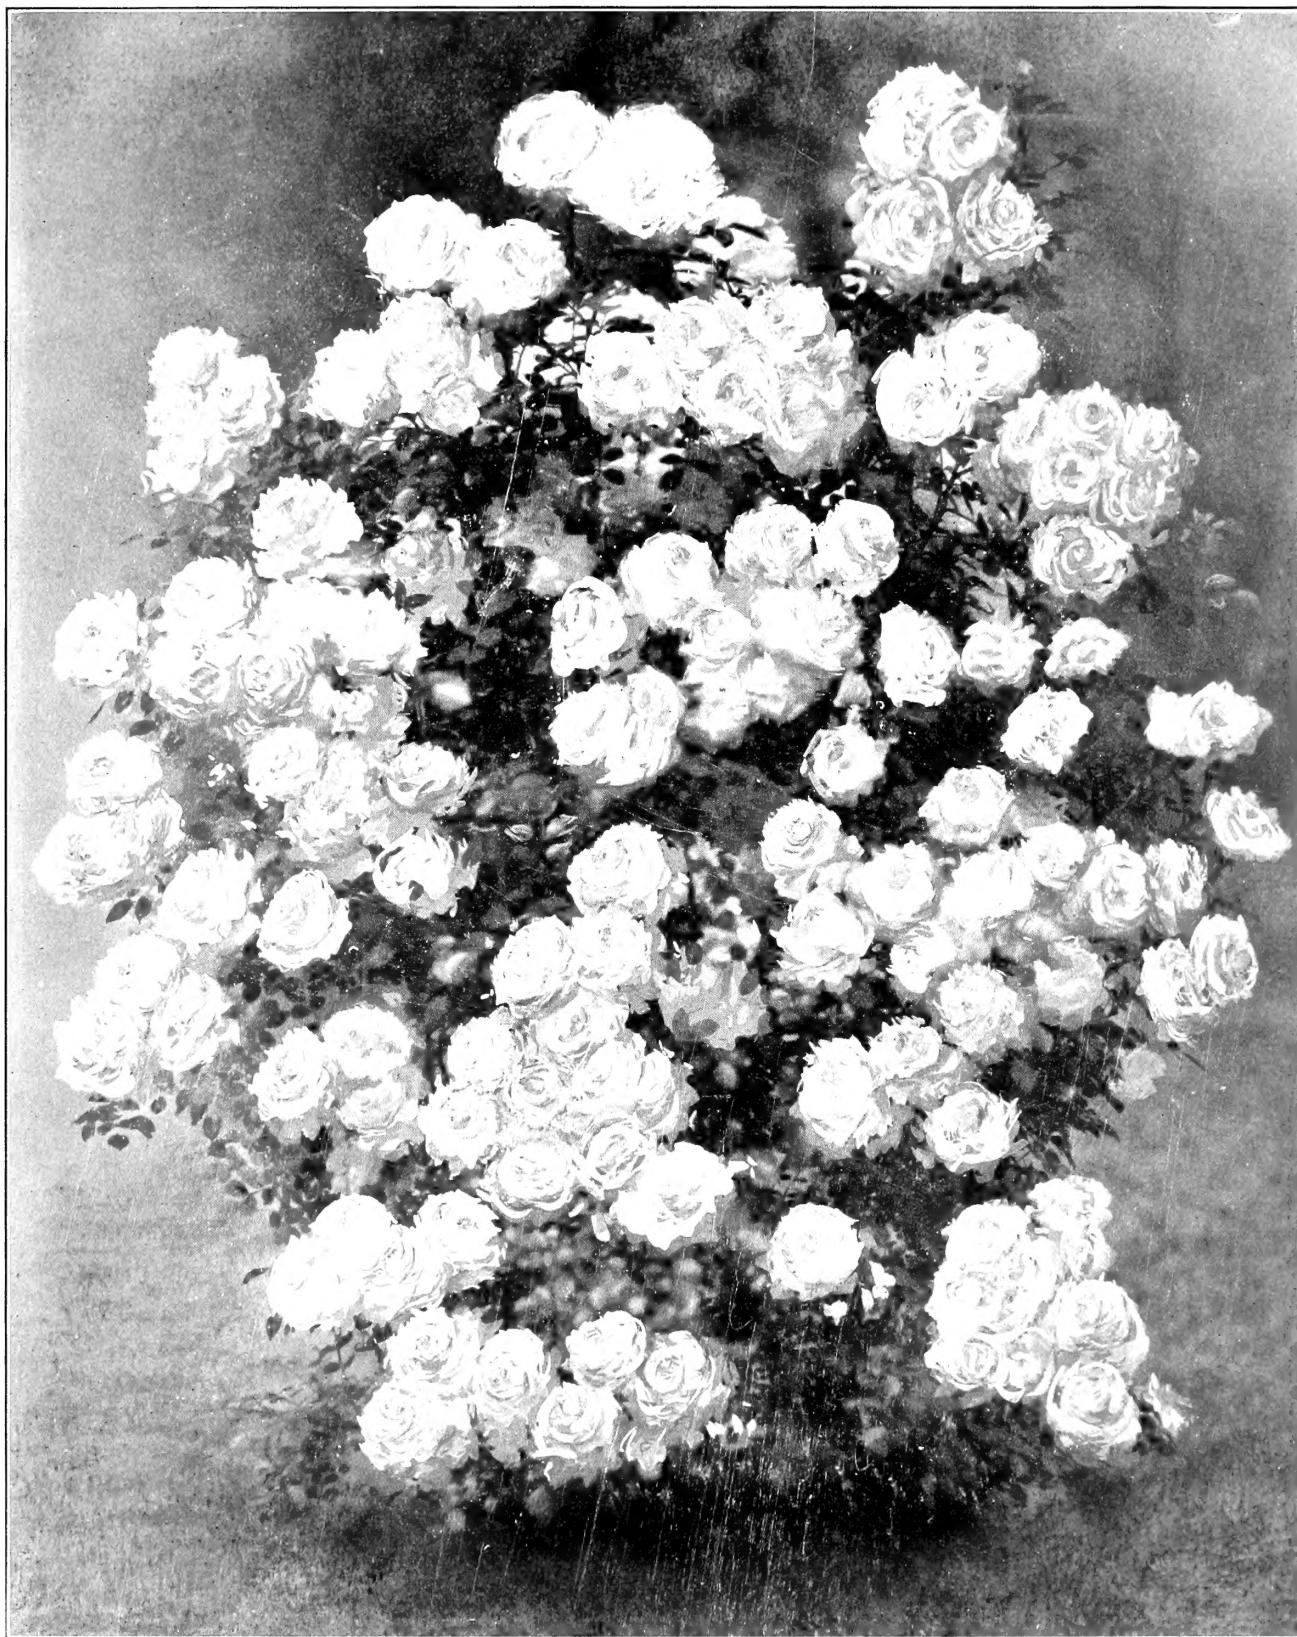

M. H. WALSH.

NOVELTIES FOR 1911

Miss Alice de Rothschild (Tea)

Not since the advent of "Marechal Niel" has any rose excited such admiration as this truly magnificent variety, which as seen growing and flowering in our gardens, was described by leading professional Rose Growers as a bedding "Marechal Niel," and up till the present our very best effort. A very flattering character indeed! The color is rich, deep citron yellow, which intensifies as the bloom expands. The flowers are very large, full and of perfect form, with high pointed center; the petals charmingly reflex. The growth is vigorous and erect, free and continuous in bloom. An invaluable exhibition and decorative rose; deliciously fragrant (Marechal Niel perfume); superb in every respect, and specially valuable for pot culture, as the color does not fade. \$2.50 each.

Mrs. Foley-Hobbs (Tea)

In this novelty it is our proud privilege to have produced a variety that must stand pre-eminent in this class. It is beyond question the best Tea yet introduced, as it possesses in a most marked degree every quality necessary to constitute a good and perfect rose. The growth is robust and vigorous, every shoot being crowned with a flower bud which develops into a bloom of marvellous size, perfect form, and exquisite finish. It is a veritable giant among Teas, the huge thick shell-shaped petals creating a bloom of exceptional merit. Color delicate ivory-white, faintly tinged clear pink on the edges of the petals. For exhibition purposes, this rose stands without a rival. Deliciously tea-perfumed. \$2.50 each.

May Kenyon Slaney (H. T.)

A rose of wonderful distinctness and charm, possessing very vigorous growth and good branching character; and profuse and continuous-flowering habit; the blooms are large, full and of wonderful finish. The color is a charming blush-pink on rich cream, the pink intensifying as the flower expands. Delightfully tea-perfumed. The sea-green foliage and the bronzy-colored thorns are most effective and attractive. A most beautiful and valuable novelty. \$2.50 each.

Mrs. Charles Custis Harrison (H. T.)

Is a rose of great beauty and distinctness. The flowers are produced in wonderful profusion, and are carried on long and rigid foot-stalks, which add greatly to their charm. The growth is very robust and erect; the blooms are large, full and of globular form; the petals smooth, circular, and of great substance; color, deep crimson-pink on front of petals, crayoned deep crimson-carmine on the reverse side—a warm color that lights up when held in varied positions of light. Very highly perfumed. An absolutely distinct and valuable addition, which will be largely sought after when known. \$2.50 each.

Mrs. Wilfred Lloyd (H. T.)

A very valuable addition to this class, possessing vigorous growth, free-branching habit and distinctly beautiful foliage; the flowers, which are produced profusely, are large, full and globular, perfect in form and with delightful reflexes; the color is a lovely bright rose-pink, of great intensity as the bloom expands—a non-fading color. A very highly perfumed and beautiful rose of "La France" type. \$2.50 each.

Walsh's Handbook of Roses,

Mrs. Fred. Straker (H. T.)

It would be difficult, if not impossible, to either speak or write in too eulogistic terms of this unique creation. Its marvellous beauty, combined with its thorough distinctness, commanded the admiration and attention of every visitor to our gardens during the season of 1910. As a decorative rose it is without an equal, and in our opinion is the most delightful rose we have raised. The growth is erect, vigorous and branching; the blooms are produced in most extraordinary profusion throughout the entire season; the color in the young flower is orange-crimson; as the bloom develops it becomes silvery fawn on front of petals, and delicate orange-pink on the back. It is barely possible to adequately describe this—it is not too much to say—masterpiece; its long and elegant buds come with a perfectly spiral finish, which so closely blends or co-mingles its warm and charming colors as to give it a chatoyment (play of colors) all its own. Its highly tea-perfumed and perfectly-formed flowers combined with the bronzy-green foliage, which is mildew-proof, stamps this rose with the hallmark of perfection. \$2.50 each.

Mrs. George Preston (H. T.)

A most beautiful and thoroughly distinct rose, possessing great vigor and robustness; flowering in profusion. The blooms are very large, full and of globular form; the petals, which are of immense size and substance, are smooth and circular. The color is a very delicate warm silvery rose-pink—a truly delightful color. Sometimes in Autumn it is lighted up with delicate orange; very fragrant. A most useful and valuable addition for exhibition or any purpose. The blooms are of enormous size and possess great lasting qualities. \$2.50 each.

Mrs. Leonard Petrie (H. T.)

Probably the most distinctly beautiful yellow coloring of recent creation, possessing excellent habit of growth, and free and continuous-flowering qualities. The flowers are large, full and very smooth, with delightful fragrance; the color is a honey-yellow, with delicate claret smear on back of the outer petals, becoming, as the blooms expand, pale sulphur-yellow, which does not fade. A very decided acquisition, more especially for decorative purposes. Absolutely distinct and unique. \$2.50 each.

Mrs. Walter Easlea (H. T.)

This is an absolutely distinct and charming rose of imbricated form, exquisite finish, and robustly vigorous and erect growth, with handsome deep green foliage. The blooms are large, full, and are most freely produced; the petals are very massive, smooth and circular; the color is a glowing crimson-carmine, which, as the flower expands deepens to intense crimson-orange; the back of petals being of intense satiny crimson, lends additional charm to this lovely variety, which will prove an indispensable addition to this popular class either as an exhibition or decorative kind. It is deliciously perfumed, and is an excellent forcing rose of distinct merit. \$2.50 each.

Viscount Carlow (H. T.)

Truly a remarkably attractive decorative rose, possessing ideal habit of growth, wonderfully free-flowering propensity and handsome dark bronze mildew-proof foliage. During the flowering season the plant is virtually garlanded with chaste, highly tea-perfumed blooms; it is most free and persistent in flowering, and will, therefore, prove to be an ideal bedding variety. The color is warm carmine-pink, stained on deep cream; the stiff shell-shaped petals while developing being distinctly edged carmine. Distinct and beautiful. \$2.50 each.

Walsh's Evangeline, reproduced from photograph taken in Miss Fay's garden

Walsh's New Hardy Hybrid Seedling, Wichuriana and Polyantha Roses

These interesting varieties may be properly called a new race of hardy decorative Rambler or Climbing Roses. They originated at Woods Hole. Numerous awards in silver cups, medals, etc., have been received by these Roses, when exhibited in this country; they also were awarded gold and silver medals at the principal exhibitions in England.

They may be grown either on trellises or to cover pergolas, or they may be trained on rustic posts, as specimens, in pyramid or other forms. The effect produced is marvellous. They are also suitable for growing in tubs as specimens for piazzas, porches, etc., as well as being useful for specimen plants for the greenhouse or conservatory. The beautiful foliage, hardiness, free-blooming qualities, and wide range of colors in single and double flowers entitle them to the honor of Queen of the Garden Roses. Their introduction makes it possible to produce effects of great beauty which could not have been created a dozen years ago.

The long season of blooming is a valuable quality. Commencing to bloom as early as June 10 to 15, they flower in succession until about August 1, and the blossoms hold on without drooping from three to four weeks. This is particularly noticeable in Hiawatha, Lady Gay, Delight, and Cinderella. So really the time of Roses is extended from early June until August. The latter part of September, Hiawatha, Delight and Coquina produce blooms quite freely, continuing until frost takes them.

My stock of these Ramblers is the largest in the country, and the plants I offer are two years old, strong, field-grown, dormant, own-root plants, that will produce bloom the first year of planting. The quality of these plants must not be confused with plants from two-, three- or four-inch pots. While they may grow rapidly, the small plants will require at least two years to produce the effect which my plants give the first year.

A Few Comments of the English Press About Walsh's Lady Gay, Illustrated on Page 6, and Described on Page 11:

A large crowd collected round the new Rose Lady Gay, which was in Wm. Paul's Group. . . . There is not the slightest doubt that in the near future this will be one of England's most cherished flowers.—*Daily Chronicle*.

Quite one of the best things among climbing Roses.—*Gardener's Chronicle*.

A perpetual source of wonder. . . . Yielding huge trusses of pink flowers.—*The Standard*.

A Triumph of the Rose Grower's Art—Walsh's Lady Gay

What English Gardening, illustrated, says about Lady Gay:—"The advent of Dorothy Perkins was a notable event, and it still holds its own, but Lady Gay has quite eclipsed Dorothy Perkins. Trusses containing nearly one hundred blooms and buds have been counted on a specimen of this lovely Rose. The trusses are so numerous, breaking out from the base to the summit, that a most beautiful mass of bloom is possible. These Ramblers need the best treatment, and they well repay any extra trouble." For description and price, see p. 11.

WALSH'S NEW RAMBLER ROSES—Continued

Walsh's "Summer Joy," 1911

Another addition to my new seedling Rambler class, and unquestionably a beauty. The variety is hardy and distinct in color, form and growth.

The clusters of bloom are double, and borne on strong shoots eighteen to twenty inches long. When in full blossom they droop gracefully, closely resembling a plume.

The buds are pure white, gradually developing to dark rose color. The pleasing combination of white buds and dark rose blossoms, together with the large, glossy foliage, presents a scene of splendor which may best be described as a Summer joy in the garden. It is a grand Rose of great merit and will surely take front rank in my collection of Ramblers. Price, \$2.00 each.

Walsh's New Seedling Climbing or Rambling Rose, "Lady Blanche"

In this Rose we have a valuable acquisition to the new rambling or climbing *Wichuraiana* Rose.

It is the most fragrant of all the varieties in the class of rambling Roses. It is hardy, of vigorous growth, and produces freely clusters of flowers of the purest snow-white. The flowers are very double and are borne in large clusters. The foliage is a glossy green. The color and fragrance of this variety make it indispensable in the Rambler class. Price, \$2.00 each.

Walsh's New Seedling Rambler or Climber, "Troubadour," 1911

In this variety we have a distinct and valuable addition to the popular class of Rambler Roses raised at Woods Hole. Color bright red, shaded maroon; flowers double; foliage large, dark, glossy green; blooms produced in large clusters, each spray making a most perfect bouquet or pyramid of flowers. Price, \$2.00 each.

Walsh's New Seedling Rambler or Climber, "Maid Marion"

A charming single variety. Growth vigorous; large, glossy foliage; flowers produced in large sprays; individual flowers very large and slightly incurved. Color white; tips of petals pink; center of flower filled with yellow stamens. A most beautiful combination of flower and foliage. Price, \$2.00 each.

Summer Joy

New Seedling Rambler or Climbing Rose, Walsh's "Excelsa"

Color brilliant scarlet-crimson. This variety I consider one of the best of my productions. Its meritorious qualities combine hardiness, vigor of growth, graceful, pendulous habit, fine dark, glossy foliage, and large trusses of brilliant scarlet-crimson double flowers which are not, like the old Crimson Ramblers, subject to mildew, which causes the foliage to rust and look shabby. I am confident *Excelsa* will displace the Crimson Rambler on cottages, pergolas, etc., when its good qualities are known.

Price, for dormant field-grown plants, two years old, \$1.50 each.

Extracts from the English horticultural magazine, *Garden*:

THE NEW ROSE EXCELSA.—Last year, at the Temple Show, American Pillar was the most sensational variety exhibited. This year it was *Excelsa*, a most brilliant production of that prince of Rambler raisers, Mr. M. H. Walsh. *Excelsa* is equally as brilliant as *Hiawatha*, but its blooms are double or nearly so, there being about five rows of petals. Its graceful, pendulous habit, typical of the true *Wichuraiana* Roses, will cause a large demand for the variety as a weeping Rose. The elegant examples on tall stems which Messrs. Paul and Son of Cheshunt arranged with such effect in their gold medal group were quite the most conspicuous among a very charming variety of other weeping sorts, and the Rose deservedly received an award of merit.

Walsh's Handbook of Roses,

New Rambler Rose, Walsh's "Delight." For description see page II.

M.H. Walsh, Woods Hole, Mass.

WALSH'S NEW RAMBLER ROSES—Continued

Walsh's "Bonnie Belle"

New and single variety. Vigorous in growth; handsome foliage; most profuse bloomer. The flowers are borne in large, graceful clusters, are pink, which color contrasts splendidly with the yellow stamens in center. Price, \$2.00 each.

Walsh's "Lucile"

A charming new Climbing or Rambler Rose. One of the most beautiful Roses I have produced. It is hardy, vigorous in growth, and has large glossy green foliage. Blooms are double, and produced in large clusters on strong shoots. Color, a most delicate flesh pink; base of petals tinged with rosy salmon. The combination of flower and foliage is most harmonious. Price, \$2.00 each. (See Front Cover.)

Walsh's "Snowdrift"

New seedling and valuable acquisition to the Climbing or Rambler Rose class. Flowers are double; twenty or thirty produced on a shoot. Foliage very large and of handsome light green color. Free-blooming and vigorous in growth. Color of this variety is pure white. Price, \$1.50 each.

Walsh's "Cinderella"

The last of the Rambler Roses to flower. Double flowers of a darker pink than those of Lady Gay; ends of petals are quilled, producing a very unique effect. Valuable late-blooming variety. Price, \$1.00 each; extra strong, \$1.50.

Walsh's "Coquina"

A new Rambler of vigorous growth, with dark, leathery, almost evergreen foliage. Flowers shell-pink, base of petals creamy white. Price, \$1.50 each, \$12.00 per doz.

Walsh's "Milky Way"

New seedling. An improved or glorified Wichuraiana. Foliage full and habit of growth is larger and more vigorous than the parent Wichuraiana. Flowers are very large, many of them semi-double; fragrant; beautiful glossy foliage. Perfectly hardy. Color pure white; center filled with a crown of yellow stamens. Tips of petals tinged lightly with pink. Price, \$1.50 each, or \$15.00 per dozen.

Extract from the Gardeners' Magazine:

NEW SINGLE ROSE MILKY WAY.—Every year the race of Hybrid Roses derived from Rosa Wichuraiana increases,

and though double varieties like Dorothy Perkins and Lady Gay are well able to hold their own, raisers have not forgotten the grace and beauty of single Roses. Hiawatha holds a prominent position among single varieties that show in a marked degree the influence of R. Wichuraiana, and the brilliance of its blooms appeals to most lovers of Roses. Jersey Beauty, a single white variety, had some popularity, but has not "caught on" like Hiawatha. There is, however, a newcomer that bids fair to fill up the gap and provide a single Wichuraiana Rose with an abundance of pure white flowers. This is Milky Way, a new seedling. It far surpasses R. Wichuraiana and Jersey Beauty, and bears its lovely white blossoms in large elegant panicles, the pure whiteness of the flowers being enhanced by the large central cluster of golden stamens. There is a lightness about Milky Way that is sure to obtain for it a host of lovers. As a pot plant for flowering in the conservatory or winter garden during late Spring it is peculiarly beautiful, and it is really wonderful what large and lovely pillar specimens, branching and flowering in a most graceful fashion, can be produced in comparatively small pots. As a pillar plant or as a weeping standard on a tall stem Milky Way will be found most useful.

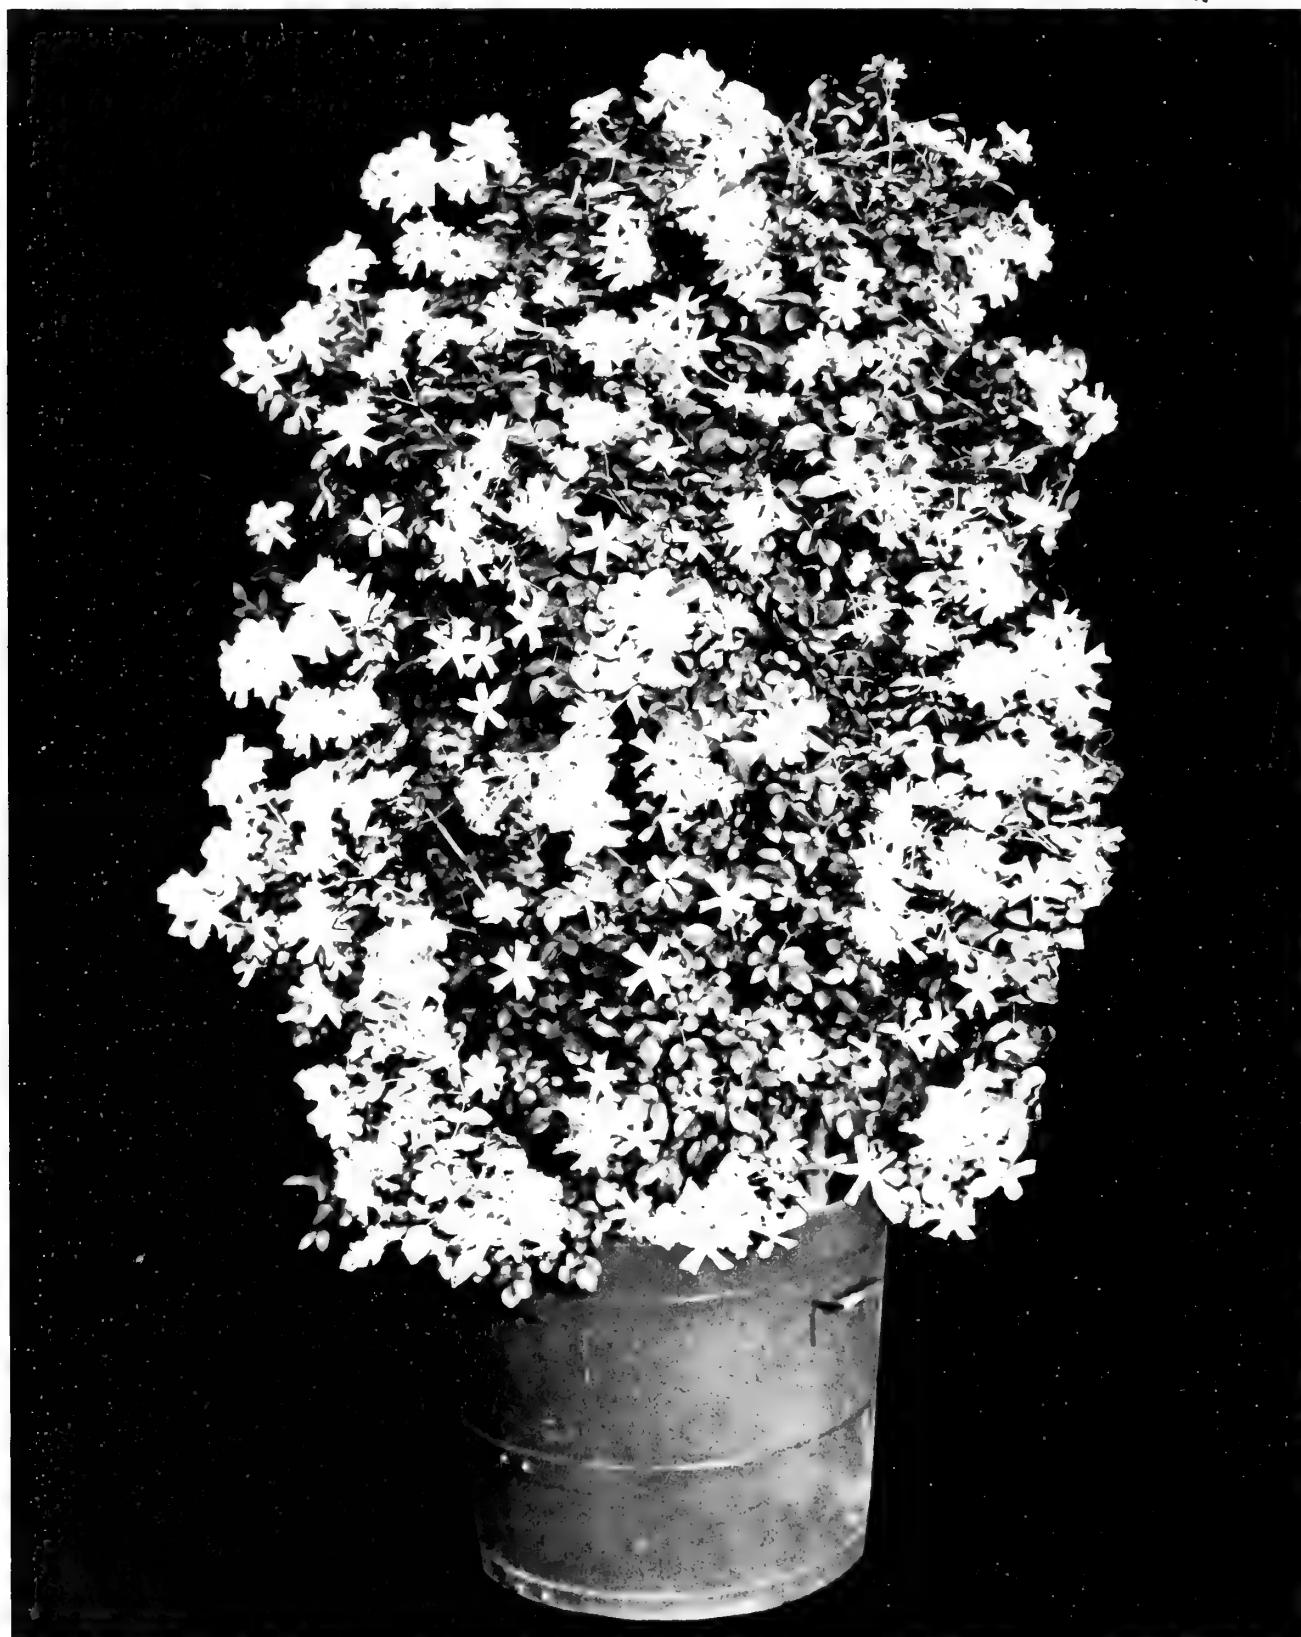

Walsh's "Kalmia"

A grand new single free-flowering hardy Rambler. Foliage dark glossy green; flowers are white with the upper half of the petals tinged with pink, producing a beautiful effect. Price, \$1.50 each.

Walsh's New Rambler, "Milky Way"

Walsh's Handbook of Roses

Walsh's "Paradise." Description of this grand variety will be found on page 13.

Other New Ramblers of Recent Introduction and Sterling Merit

Walsh's "Babette"

A new hardy seedling Climbing or Rambler Rose of vigorous growth. Flowers double, borne in clusters. They are dark crimson, tinged with white; a distinct and valuable acquisition. Field-grown plants, \$1.50 each.

Walsh's "Debutante"

A new seedling originated by me, and awarded a silver medal by the Massachusetts Horticultural Society in 1900. A distinct acquisition to the popular Rambler class. This Rose is of a beautiful soft pink color; flowers borne in clusters, similar to Crimson Rambler; very fragrant, the blooms, when open, have the delicate odor of the Sweetbriar. Flowers are double and of uniform size. Foliage, dark green and glossy. A splendid variety, and especially suited for climbing or trailing. Blooms freely in July, and also in September and October. Illustrated on page 14. Strong field-grown flowering plants, 75 cents each, \$6.00 per doz.

Walsh's "Delight"

New single Rambler or Climbing Rose. Vigorous grower; glossy foliage; flowers borne in large clusters, many of them having two rows of petals. These hang in graceful form and nearly every bud produces a flower; color bright carmine, base petals white, center filled with yellow stamens; a most harmonious combination of flower and foliage. Perfectly hardy. For full-page illustration see page 8. Field-grown plants, \$1.00 each; second size, 75 cents each.

Walsh's "Evangeline"

A distinct variety with single flower, 2 inches in diameter. The foliage is very luxuriant. Flowers are borne in large clusters, are white with the tips of petals pink, deliciously fragrant. Foliage on the young growth of this variety is particularly attractive as it is of a beautiful bronzy green. The contrast of the flowers with the handsome foliage of this variety is most charming. Evangeline is suitable for pergolas, parkways, trellises or for whatever purpose it may be desired. Perfectly hardy. See illustration on page 5. \$1.00 each, \$9.00 per dozen.

Walsh's "Lady Gay"

Flowers are of cherry-pink color, foliage glossy green. A grand variety, vigorous and perfectly hardy; an improvement on Dorothy Perkins. See illustrations on pages 6 and 17. 50 cents each, \$5.00 per doz., extra-large plants 75 cents each.

Walsh's "La Fiamma"

This new Rambler, as the name denotes, is flame-colored. Clusters of flowers are very large, borne on strong stems; plants make a growth of fifteen feet in a season; flowers single. Perfectly hardy. \$1.00 each, \$9.00 per doz.

Another noteworthy departure, Walsh's "Minnehaha." For description see page 13.

WALSH'S NEW RAMBLER ROSES—Continued

Walsh's "Hiawatha"

This seedling, which attracted so much attention and evoked many favorable comments when exhibited for the first time at the Spring exhibition of the Massachusetts Horticultural Society, in March, 1902, is a distinct acquisition to the ever-popular Rambler class of Roses. It is a seedling from Crimson Rambler. The flowers are single, and are of deep intense crimson shade with the petals shading to a pure white at the base. The foliage is of a light glossy green. The remarkable beauty and the striking effect of a plant in full bloom must be seen to be thoroughly appreciated. Flowers very freely, and it is undoubtedly one of the best of the single Roses now extant. It is an excellent plant for forcing, and is well suited for climbing or trailing. The illustration produced herewith gives but a faint idea of the marvellous beauty of this variety. The plant is perfectly hardy, and the leaves and stems are very tough and less susceptible to the attacks of insects than any other Rose in this popular class. (See comments of the English press on page 15.) \$1.00 each; second size, 75 cts. each.

Walsh's "Minnehaha"

A charming double satiny-pink flowering Rambler of a most pleasing color. It is quite distinct from the various shades of pink and a most attractive Rose. Flowers borne in large clusters; foliage glossy green. Awarded silver medal. \$1.00 each.

Walsh's "Paradise"

Single flower, pink and white. Formation of the petals has a peculiar and artistic effect, edges of petals being imbricated. Flowers hang in graceful clusters, the plant being heavily laden with bloom. Foliage light glossy green. Distinct and valuable acquisition. Perfectly hardy. Field-grown plants, \$1.50 each; second size, \$1.00 each.

Hiawatha on Post

New Climbing Roses of Foreign Origin

"Shower of Gold," 1911, (Paul & Son)

Very vigorous, and enormous laterals are produced which are densely clad with beautiful glossy foliage; almost the color of "William Allen Richardson," but with not so much orange. Very fine. Plants from pots after June 1, \$1.50 each.

Goldfinch

New English Rambler. A new yellow-flowering Rose superior in color to the so-called Yellow Rambler *Aglia*. It is perfectly hardy; growth is vigorous and foliage handsome. Price, \$1.00.

Tausendschön

A new German Rambler. Pink and white, double flowers of splendid size are borne on the same cluster. Blooms profusely in large clusters; fine vigorous growth and bold foliage. A unique novelty. Price, \$1.00.

Una (Climbing Hybrid Tea)

Color pale buff-yellow, almost white when fully expanded, flowers large, and semi-double, lasting long on the plant; a striking variety; suitable for pillars, hedges, etc. Price, 50 cts.

Walsh's Handbook of Roses,

272

Walsh's "Debutante." A distinct acquisition of the highest merit. For description see page II.

RAMBLER ROSES—Continued

New Rambler "Carissima"

A new seedling from Wichuraiana. The flowers are of a delicate flesh color, which remains true and does not fade. The foliage is of a bright glossy green. This Rose blooms freely, producing flowers that are very double. The petals are quilled or imbricated and present a very striking resemblance to a Carnation, an effect that is decidedly unique in this variety of Rose. The sweet fragrance of the blooms, which is an additional feature of this Rose, does not lessen after cutting. The plants are perfectly hardy and make a vigorous growth. One of the most remarkable Rose novelties of recent years. \$1.00 each, \$9.00 per dozen.

The Farquhar Rose

Bears magnificent clusters of bright pink, double flowers. It is perfectly hardy and retains its glossy, bright green foliage until very late in the Fall. 50 cts. each, \$5.00 per doz.; stronger plants, 75 cts. each, \$7.50 per doz.; extra-strong plants, \$1.00 each, \$10.00 per doz.

Sweetheart

A new climbing or trailing variety. This Rose, originated by me, has received enthusiastic praise wherever seen, and was awarded a silver medal by the Massachusetts Horticultural Society in 1899, the year of its introduction. It is a vigorous grower, and similar in habit to the ever popular Crimson Rambler. The color of bloom when in bud is a bright pink, which shades to a soft white when flowers are fully expanded. Blooms are very double, and average $2\frac{1}{4}$ inches in diameter; deliciously fragrant. Foliage glossy dark green. Strong, field-grown flowering plants, 75 cts. each, \$6.00 per doz.

Yellow Rambler (*Aglaia*)

Of vigorous climbing habit, with light green foliage; flowers borne in large clusters and are of beautiful shell-shaped form. Color is a bright yellow. 35 cts. each, \$3.00 per doz.; extra-strong plants, 50 cts. each.

What English Gardening, illustrated, says about Walsh's Hiawatha.

HIAWATHA.—This is a delightful break from the other forms. Its color is a glowing ruby-crimson, with a clear white eye, and the flowers, each about $1\frac{1}{2}$ inches across, are produced in long trails, as in Lady Gay, and contain from forty to fifty in a trail. The sprays are just as pendulous as in Dorothy Perkins and Lady Gay, and it may readily be imagined what such a glorious color would give to a Rose of this description, fitting it so admirably by the light arrangement of spray and foliage for the most delicate floral arrangement.

Crimson Rambler

A universal favorite with magnificent large trusses of brilliant crimson flowers. The plants are of strong, climbing habit, with bright, glossy green foliage. They are easily forced and the flowers lose none of their brilliancy under glass. 35 cts. each, \$3.50 per doz.; extra-large flowering plants, 50 cts. each.

Dorothy Perkins

Soft light pink, flowering profusely in large clusters; fragrant and lasting. 35 cts. each, \$3.50 per doz.; extra-strong plants, 50 cts. each.

Sweetheart

Walsh's Handbook of Roses,

Walsh's "Hiawatha." For comment of the English Press about this remarkable novelty see page 15.

Lady Gay on columns. Reproduced from photograph taken in Miss Fay's garden

Hybrid Polyantha Roses

Annen Muller. Color bright deep pink, flowers exquisitely formed, resembling a Cactus Dahlia. A delightful early- and late-flowering variety. 50 cts. each.

Aschenbrodel. Peach, center salmon; small, full, very free; quite first-rate for bedding.

Clothilde Soupert. Outer petals pearly white, center rosy; large for its class; very full and beautifully imbricated; exquisite. 50 cts. each, \$5.00 per doz.

Madame N. Levavasseur. Rosy crimson, marvelously free-flowering; a splendid decorative Rose of dwarf habit. Grand for masses. 50 cts. each, \$5.00 per doz.

Marie Pavie. A beautiful Polyantha; perpetual Summer-blooming variety; hardy; vigorous in growth, and one of the best and most satisfactory in the Polyantha class. Flowers white with rose center. It is one of the earliest to bloom and continues until cut down by the frost. 50 cts. each, \$5.00 per doz.

Mignonette. Soft rose, changing to white; small and pretty; blooming in clusters. 35 cts. each, \$3.50 per doz.

Perle d'Or. Nankeen-yellow, with orange center; small and full; very beautiful. 50 cts. each, \$5.00 per doz.

China Rose

Hermosa. Much like Old Blush in color. Flowers large and full and freely produced. A good grower. 35 cts. each, \$3.50 per doz.

Noisette Roses

William Allen Richardson. Deep orange-yellow; small, but very showy. 50 cts. each. extra strong 75 cts.

Moss Roses

35 cts. each, \$3.50 per doz.

Blanche Moreau. White. **Glory of Mosses.** Pink. **Celina.** Brilliant crimson. **Laneii.** Bright rosy crimson. **Common.** Double pale rose. **Marie de Blois.** Rosy lilac. **Crested.** Rosy pink. **Salet.** Light rose.

Austrian Briar

Austrian Copper. Bright reddish copper, flowers single; very striking and beautiful. 50 cts. each, \$4.00 per doz.

Harrisoni. Very handsome yellow. 50 cts. each, \$4.00 per doz.

Persian Yellow. Deep golden yellow. Very large and extra fine. 50 cts. each, \$4.00 per doz.

Tree or Standard Roses

These are much grown as ornamental tree Roses for the garden. The stems should be wrapped in straw to serve as Winter protection. They should be tied firmly to the stakes and a mulching of coarse manure placed around the base of the plants.

I can supply these $3\frac{1}{2}$ to 4 feet high from \$1.00 to \$1.50 each, and from \$10.00 to \$15.00 per dozen, including the best and hardiest of the Hybrid Perpetuals in variety and the hardiest of the Hybrid Teas in the various colors.

Lady Gay in standard or tree form, 4 ft. high. \$2.00 each.

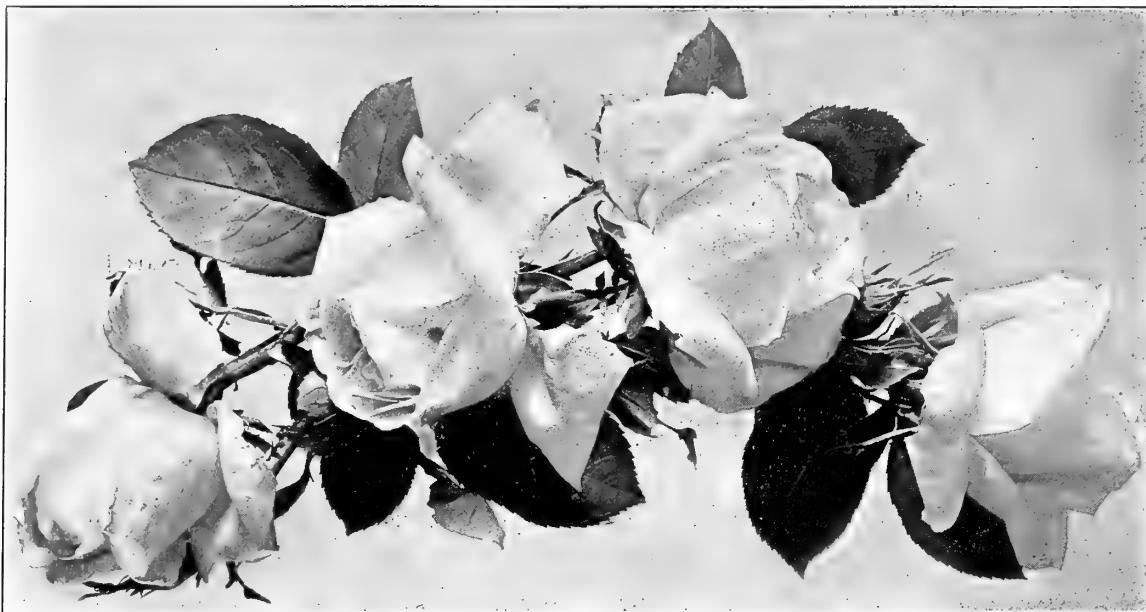

Hiawatha in standard or tree form, 4 ft. high. \$2.00 each.

Gruss an Teplitz in standard or tree form, 4 ft. high. \$1.50 each.

Walsh's New Seedling Rambler, "Wedding Bells"

This charming Rose, offered for the first time in 1907, has proven to be a valuable acquisition. Plant grows vigorously, is hardy and distinct in foliage. "Wedding Bells" is the most floriferous Rose yet produced. All the buds on each shoot produce beautiful flowers of white color with the upper half of petals soft pink. It is admirably suited for growing as a specimen bush plant in the garden and may be grown in hedge form for windbreak or shelter in the garden. \$1.00 each, \$9.00 per doz.

Hybrid Perpetual, or Remontant Roses

SOMETIMES CALLED JUNE ROSES

The following collection consists of strong, two-year old plants; vigorous growing, low-budded, field-grown and dormant plants of the best quality. Prices for all sorts, except where otherwise noted:

40 cts. each, \$4 per doz., \$30 per 100; extra-strong plants, selected, 50 cts. each, \$5 per doz., \$35 per 100.

Abel Carriere. Rich velvety maroon, shaded with violet.

Alfred Colomb. Very large and full. Color is a bright red.

Alfred K. Williams. Carmine-red, changing to magenta.

Alphonse Souperf. Bright rose, free-flowering and very large.

Annie Wood. Beautiful clear red, very large and full.

Auguste Rigotard. Cherry-red, large, full, and good form.

Ards Rover. Introduced in 1898. A vigorous grower. Crimson, shaded maroon.

Baron de Bonstetten. Velvety, blackish-crimson; large.

Baroness Rothschild. Very beautiful, clear pale rose.

Beauty of Waltham. Bright light red, full, and of perfect form.

Ben Cant. Deep clear crimson with dark shading.

Benoit Comte. Very bright red, tinged with vermillion.

Bertha Giemen. Creamy white; very large and vigorous.

Bob Davison. Dazzling scarlet, shaded crimson; large.

Boule de Neige. Pure white; very free bloomer.

Camille Bernardin. Bright crimson; large, full and fine.

Captain Hayward. Bright carmine-crimson. A grand Rose.

Caroline d'Arden. Pure rose; very large, full; very fragrant.

Charles Darwin. Brownish-crimson, full and fragrant.

Charles Lefebvre. Fine, brilliant velvety crimson. Excellent.

Clio. Flesh color, shaded in the center with rosy pink.

Comte de Raimbaud. Rich velvety crimson; very distinct.

Comtesse de Ludre. Bright cherry-crimson; fine form.

Comtesse d'Oxford. Bright carmine-red; large flowers.

Countess of Rosebery. Reddish salmon-pink; vigorous.

Dr. Andry. Deep carmine-red, very bright; large and full.

Dr. W. Gordon. Brilliant satin pink; extra large. \$1.50 ea.

Duchess of Bedford. Dazzling, light, scarlet-crimson.

Duchesse de Vallombrosa. Very light flesh color.

Duchess of Fife. Beautiful, soft silvery pink; very fragrant.

Duchesse de Morny. Delicate, bright rosy pink; very large.

Duc de Rohan. Fine brilliant carmine; large and full.

Duke of Edinburgh. Brilliant scarlet-crimson, shaded maroon.

Duke of Fife. Rich crimson-scarlet; large and full.

Duke of Teck. Bright crimson-scarlet; large, full and distinct.

Duke of Wellington. Velvety red, shaded with deep crimson.

Dupuy Jamain. Very brilliant cerise; large and full.

Earl of Dufferin. Brilliant velvety crimson, shaded maroon.

Ellen Drew. Light silver pink, with peach shading.

Etienne Levet. Carmine-red; very large, and fine form.

Eugene Verdier. Bright rosy flesh, shaded with silvery white.

E. Y. Teas. Bright red; most perfect form; very double.

Ferd. de Lesseps. Rich crimson, shaded with violet.

Fisher Holmes. Scarlet-crimson; very rich and beautiful.

Fimbriata. Brilliant scarlet; petals fimbriated.

Frau Karl Druschki. Snow-white; petals shell-shaped; very large, full, perfectly formed. A superb Rose.

Francois Michelon. Deep rose, reverse of petals silvery; very large and full. A grand flower.

Walsh's Handbook of Roses

Frau Karl Druschki

HYBRID PERPETUAL ROSES—Continued

General Jacqueminot. Brilliant crimson-scarlet; excellent.

Gloire de Margottin. Dazzling red, almost scarlet.

Gustave Piganeau. Brilliant carmine-lake; very large.

Heinrich Schultheis. Delicate pinkish rose; large and fine.

Helen Keller. Brilliant rosy cerise; flowers large, full and fragrant. A most distinct and lovely Rose.

Her Majesty. Clear, bright, satiny rose; exceedingly large.

Horace Vernet. Velvety red, shaded with dark crimson.

Hugh Dickson. Brilliant crimson, shaded scarlet; good size and fine form; highly perfumed. 75 cts.

Hugh Watson. Crimson, shaded carmine; blooms very large and full; highly perfumed. 75 cts.

Jeannie Dickson. A magnificent Rose. Color, rosy pink edged with velvety pink; base of petals pale yellow.

John Hopper. Bright rosy pink; very large and double.

John Stewart Mill. Bright clear red; large and fine form.

J. S. Fay. This new seedling, originated at Woods Hole, is a vigorous grower of unquestionable hardiness. The lovely double flowers are of great substance. Color is dark crimson, enlivened with scarlet. The free-flowering qualities as well as many other sterling characteristics make J. S. Fay one of the most meritorious hardy garden Roses. Awarded many first-class certificates. 75 cts.

Jules Margottin. Bright carmine; large and full; fragrant.

Jubilee. (New.) This Rose contains the darkest color, combined with pure color, which Nature is able to produce. As M. H. Walsh Rose, it was awarded the first gold medal ever given for a new Rose by the Massachusetts Horticultural Society in 1895.

Lady Arthur Hill. Rosy-lilac; most distinct and lovely.

Lady Helen Stewart. Bright crimson, shaded with scarlet.

Lady Sheffield. Brilliant rosy cerise, of fine shape.

Lawrence Allen. Clear soft pink, with lighter shadings.

Louis Van Houtte. Fiery-red, shaded crimson; very vivid.

Mabel Morrison. Pure white. A good Rose.

Madame Alfred Carriere. Pure white; elegant foliage.

Madame Crapelet. Beautiful light crimson; full and perfect.

Madame Delville. Rosy pink; good shape; highly perfumed.

Madame Eugene Verdier. Bright satiny rose, with silvery shading; large and double. An immense flower.

Madame Gabriel Luizet. Light silvery pink; very distinct.

Madame Haussman. Crimson, large and double; good.

Madame Isaac Pereire. Vivid carmine; large and double.

Madame Lacharme. White, fine form. A fine variety.

Madame Victor Verdier. Rich cherry-red; very large.

Magna Charta. Bright rose, large and full; magnificent.

Marchioness of Downshire. Satin pink, shaded silvery pink.

Marchioness of Dufferin. Beautiful rosy pink; very large.

Marchioness of Londonderry. Ivory white; shell-shaped petals of great substance.

Marchioness of Lorne. Rich rose color, with center shaded carmine; very fragrant.

Margaret Dickson. White, with pale flesh center; very large petals; handsome foliage.

Marie Baumann. Brilliant vivid red; very large, full and of perfect form; free-blooming.

Marie Finger. Bright flesh-colored rose, deeper in the center; very charming and useful; especially fine in Autumn.

Marie Rady. Brilliant red; very large, full, of splendid shape.

Her Majesty

M. H. Walsh, Woods Hole, Mass.

HYBRID PERPETUAL ROSES—Continued

Marie Verdier. Pure rose, fine cupped form, with large petals. A splendid flower.

Marquise de Castellane. Bright clear rose; very large, full, and of globular form; free bloomer.

Mavourneen. Delicate silvery pink; petals tipped with flesh color; flowers freely.

M. H. Walsh. Rich velvety crimson, suffused with scarlet. A superb Rose, vigorous, free-flowering and of erect growth; every shoot which terminates in a flower bud develops into a large and very full flower of perfect form; decidedly the best autumnal of its color. \$1.00.

Merveille de Lyon. White, with center shaded rosy peach. Flowers cup shape.

Merrie England. Rosy crimson, with petals delicately marked with silvery pink; some flaked like a Carnation.

Mrs. Cocker. Soft pink; large, full, well formed.

Mrs. Frank Cant. Clear pink, edge of petals silvery pink.

Mrs. F. W. Sandford. Blush rose, shading to white.

Mrs. Geo. Dickson. Delicate soft pink; continuous bloomer.

Mrs. Harkness. A blush sport from Heinrich Schultheis Rose.

Mrs. John Laing. Soft rosy pink; nice foliage. A very popular and satisfactory variety.

Mrs. R. G. Sharman Crawford. Deep rosy pink; outer petals shaded with pale flesh, base of petals white.

Oskar Cordel. Bright rosy carmine; very sweetly scented.

Paul Neyron. Deep rosy pink; immense flowers.

Perfection des Blanches. Beautiful pure white; blooms medium-sized and full.

Pierre Notting. Deep crimson, shaded violet; very large, full, and globular; distinct.

Pride of Waltham. Very delicate flesh, shaded with bright rose, large and full. An excellent variety.

Prince Arthur. Brilliant rich crimson; full and double.

Prince Camille de Rohan. Deep velvety maroon; fine foliage.

Queen of Queens. Pink, with blush edges, large and full.

Reynolds Hole. Rich maroon, shaded with crimson; distinct.

Rev. Alan Cheales. Pure lake, with reflexed silvery white, shaded black petals.

Robert Duncan. Bright rosy-lake; flowers large and well-formed; a highly meritorious variety either for garden decoration or exhibition.

Salamander. Bright scarlet-crimson. A magnificent flower.

Senateur Vaisse. Fine dazzling red; large, double, and fine form; an old favorite; very free-blooming.

Sir Rowland Hill. Rich deep port-wine, shaded with deep maroon; fine form.

Star of Waltham. Deep crimson, rich and effective; very large, double, and of fine form.

Soleil d'Or. (Briar, perpetual flowering.) Golden yellow, shaded with orange and crimson, a very rich and striking mixture of colors; large and full, somewhat flat, very sweet. Plant is vigorous and hardy. 50 cts., \$5.00 per doz.

Sultan of Zanzibar. Blackish-maroon, petals edged with scarlet.

Suzanne Marie Rodocanachi. Soft pink; good form.

T. B. Haywood. Crimson-scarlet, with darker shading.

Thomas Mills. Crimson; large and full. A grand Rose.

Tom Wood. Cherry-red; large and double; shell-shaped petals. A really grand variety.

Ulrich Brunner. Cherry-crimson; of large size; fine form; good garden Rose.

Ulster. Bright salmon, strongly perfumed; a superb variety. Immense blossoms, beautiful foliage, and a grand grower.

Walsh's "Urania." My new seedling, ever-blooming hardy Rose. A seedling from the American Beauty. In vigor of growth it partakes of the parent plant. The color of the flowers is distinct, being a bright crimson. Of large size. Straight stems and large, luxuriant foliage. A grand and continuous hardy Summer-blooming Rose. \$1.00.

Victor Hugo. Brilliant crimson, very glowing; good form, and most attractive; very floriferous. A superb Rose.

Victor Verdier. Fine cherry-rose, shaded with carmine; an abundant bloomer.

Xavier Olibo. Velvety black, shaded with amaranth; large, full; very useful.

J. S. Fay (Described on page 20)

Hybrid Tea Roses

THE PERPETUAL SUMMER-BLOOMING GARDEN ROSES

These form a most desirable and valuable class of Roses, admirably suited for garden decoration. They are a new race of garden Roses created by crossing Hybrid Perpetuals and Tea Roses, and their popularity increases yearly as the excellent qualities become known. The new class combines the vigor and hardiness of the Hybrid Perpetual with the free-blooming qualities of the Tea Rose. The flowers of many varieties are as large as those of the Hybrid Perpetuals while they cover a wide range of colors. Hybrid Tea Roses begin to bloom early in the season and bloom continuously throughout the Summer until cut down by frosts. For Winter care and protection, see Cultural Directions on pages 25 to 28.

Strong, two-year-old dormant plants, 50 cts. each, except where noted: \$5.00 per doz., \$20.00 for 50, \$38.00 per 100.

Antoine Rivoire. Rosy flesh, or on a yellow ground, shaded with a border of carmine; large, full. A splendid variety.

Augustine Guinnoisseau. White, slightly tinted with flesh. An excellent sort for cutting.

Avoca. (New.) Brilliant velvety crimson, with large smooth petals and high pointed center; free and vigorous. \$1.50.

Bessie Brown. Creamy white; the blooms are perfectly formed, of immense size and substance; petals shell-shaped and very highly perfumed; very fine.

Betty. The plants are extremely vigorous, with splendid dark green foliage. Flowers very large, of glorious shape and of a truly unique color, ruddy gold (a coppery rose overspread with golden yellow). Delightfully scented. 75 cts.

Captain Christy. Pale peach, center rosy crimson.

Caroline Testout. Bright satin rose, with brighter center. Large, full flower of globular shape and delightful fragrance.

Charles J. Graham. Dazzling orange-crimson. The blooms are large, and of splendid form, the petals being large, smooth, and of great substance—rarely is there a miss-shaped bloom. Its vigorous growth and large foliage, coupled with its unique color, add much to the attraction of this Rose. \$1.00.

Chateau de Clos Vougeot. Velvety scarlet, shaded fiery-red, changing to dark velvety crimson; very floriferous. \$1.25.

Colonel R. S. Williamson. (New.) Satiny white, with deep blush center; very large, full and of fine form; free and good for any purpose. \$1.00.

Countess Cairns. Cerise-carmine, not full, but of large size, with handsome petals. 75 cts.

Countess of Caledon. Rich carmine-rose color. Blooms are large and of great substance; highly perfumed.

Dean Hole. Silvery carmine, shaded salmon; absolutely distinct, and by far the finest of its color. Flowers large, of great substance and fine form. 75 cts.

Dorothy Page Roberts. Coppery-pink suffused apricot-yellow, petals very large. A very unique Rose, possessing remarkably beautiful shades of color. An ideal decorative or garden Rose, of wonderful charm. \$1.00.

Dr. J. Campbell Hall. Coral-rose, suffused white; base of petals yellow. A charming Rose of perfect form. 75 cts.

Caroline Testout

Elizabeth Barnes. (New.) Satiny salmon-rose, with fawn center, suffused yellow, outside of petals rosy red, tinted copper and yellow; flowers large. \$1.50.

Etoile de France. Velvety crimson, center vivid cerise-red; blooms large, full; cupped form.

Farben Konigin. Carmine, changing to imperial pink, medium size; very free and distinct.

Ferdinand Jamin. Flowers large, full, globular; rosy carmine, shaded salmon; very floriferous.

Florence Pemberton. Creamy white, suffused pink, edges of petals occasionally flushed peach. Flowers large, perfect in form, with high, pointed center. Awarded gold medal of the N. R. S. A magnificent Rose.

General MacArthur. Bright crimson; large, full, free-flowering, highly perfumed. Very fine.

Geo. C. Waud. (New.) Glowing orange-vermilion; large, full and perfectly formed; free-flowering. A grand acquisition to the dark-colored Hybrid Teas for the garden. \$1.00.

Germain Trochon. Salmon flesh, with center a nankeen-yellow. Edge of petals shaded with pale pink. A new and exceedingly pretty sort, useful for all purposes.

Gloire de Dijon. Buff, with orange center. Very large, double and extremely sweet. One of the hardest Tea Roses, and will succeed in any situation.

Grace Darling. Creamy white, shaded with peach; large and full, free bloomer, and very distinct.

Gruss an Teplitz. Bright scarlet-crimson. Flowers large, cup-shaped; free-flowering. Useful for pillars and posts. A superb decorative variety of highest merit.

Gustav Grunerwald. Carmine-pink, center yellow; large, full, perfect form; buds long, pointed. A splendid Rose. \$1.00.

Gustave Regis. Canary-yellow, with orange center.

M.H. Walsh, Woods Hole, Mass.

HYBRID TEA ROSES—Continued

Harry Kirk. (New.) Deep sulphur-yellow, paler toward edges of petals. Large, full flowers with smooth petals of fine substance. Blooms freely and continuously. \$1.25.

His Majesty. Dark crimson, shaded deep vermilion, crimson towards the edges; full, large, sweetly perfumed.

Hon. Edith Gifford. White flesh, center slightly tinted with salmon-rose; large and full, of fine form both in bud and when expanded; very free-flowering.

Hon. Ina Bingham. Of purest pink, deeply veined. Semi-double blooms are carried on rigid stems, possessing very massive deep green foliage. The growth is exceptionally robust. A very unique sort, creating beautiful effects when massed. The color is singularly beautiful. 75 cts.

J. B. Clark. Deep scarlet, shaded blackish-crimson. \$1.00.

Joseph Hill. Pink, salmon shaded, outside of petals pink-copper; large, full. A superb variety.

Kaiserin Augusta Victoria. Beautiful primrose; excellent.

Killarney. Flesh, shaded white, suffused pale pink; the blooms are large. A lovely and distinct Rose of great merit.

Konigin Carola. Pale satin-rose; large, full flower; very free, and good.

La France. Beautiful bright pink Rose; large, full, and fine.

Lady Ashtown. Very pale rose, shading to yellow at base of petals, reflexes of petals silvery pink. 75 cts.

Lady Battersea. Beautiful cherry-crimson, permeated with an orange shade. Of moderate size; very free-flowering.

Lady Moyra Beauclerc. Bright madder-rose with silvery reflexes; the blooms are very large, and perfectly formed.

La Tosca. Soft pink, tinted with rosy white and yellow.

Laurent Carle. Brilliant velvety carmine; very large. Valuable either for exhibition or decorative purposes. \$1.00.*

Liberty. Brilliant velvety crimson, of even shade throughout; a truly unique and charming Rose. It is most floriferous.

Lyon Rose. (New.) Shrimp-pink at ends of petals, center coral-red or salmon shaded with chrome-yellow. Flowers are large, full and perfectly formed. \$1.00.

Mad. Abel Chatenay. Carmine-rose, shaded with salmon.

Mad. Jos. Combet. Creamy white; large, full, and fine form.

Mad. Jules Grolez. Beautiful bright China Rose; large, full.

Mad. Melanie Soupert. Saffron-yellow, suffused with pink and carmine; flowers very large and of perfect shape. 75 cts.

Mad. Ravary. Beautiful orange-yellow; blooms large.

Maman Cochet, White. A superb, hardy variety.

Maman Cochet. Carmine, mingled with salmon-yellow.

Marquise Lita. Carmine-rose, with vermilion center.

Marquise de Salisbury. Fine, bright velvety red; vigorous.

Mary, Countess of Ilchester. Warm crimson-carmine flowers of great size, with large smooth circular petals; erect growth; most attractive and handsome deep green foliage. Hybrid tea perfume. A variety of much merit and distinction. \$1.50.

Miss Cynthia Forde. Deep brilliant rose-pink, shading on the back of the petals to light rosy pink. The flower is very large, perfectly formed and very full; free-flowering; sweetly perfumed, and lasts a long time in good condition. A fine variety for garden decoration. \$1.25.

Mrs. A. R. Waddell. Rosy scarlet bud, opening reddish-salmon, reverse of petals rosy scarlet, semi-double. Very lovely; fine for bedding. \$1.00.

Mrs. A. M. Kirker. Clear bright cerise; large, full, well formed; very floriferous. \$1.00.

Mrs. Aaron Ward. Indian-yellow, occasionally washed salmon-rose; very large flowers. \$1.00.

Mrs. David Jardine. (New.) Bright rosy pink, outer petals salmon-pink. \$1.50.

Mrs. Peter Blair. Lemon-chrome, with golden yellow center; flowers of lovely shape; blooms freely and continuously. 75 cts.

Mrs. Theodore Roosevelt. Creamy white; center rose. 75 cts.

Mrs. W. J. Grant. A truly superb Rose; imperial pink—a rare color. The flowers are sweetly perfumed.

Oberhofgartner Terks. Light salmon-pink; large, full, free-flowering. \$1.00.

Papa Gontier. Rosy crimson; fine long buds.

Pharisaer. Rosy white, shaded salmon; very floriferous.

Reine Marie Henriette. Deep cherry-red. A climbing Rose.

Prince de Bulgarie. Deep rosy flesh, shaded with salmon; flowers very large and full.

Rev. D. Williamson. Dark crimson, shaded maroon. 75 cts.

Richmond. Pure red-scarlet; of free-growing and flowering habit; valuable for forcing.

Souvenir du Pres. Carnot. Flesh, shaded white.

Souvenir de Mad. Eugenie Verdier. Electric white, shaded saffron-yellow. A very useful and pretty variety.

Souvenir de Pierre Notting. Apricot-yellow, blended with coppery yellow; large and finely formed flowers. 75 cts.

Theresa. Deep orange-apricot, passing to madder-pink, with carmine splashes. As the flower expands, it becomes ecru veined flesh pink, passing to silvery pink. The flowers, which are semi-double, are produced continuously in the greatest profusion, and are delicately tea-perfumed. The plant possesses an excellent constitution, and its habit of growth is perfect. A most charming decorative Rose of undoubted merit. \$1.25.

Viscountess Folkestone. Creamy white, center deep salmon-pink, petals of great substance; very floriferous. A grand Rose.

White Killarney. A pure white sport from our fine pink H. T. Killarney. Should prove a great acquisition for general culture. \$1.00.

William Shean. Purest pink, delicately veined with ochre; free-flowering; of immense size. 75 cts.

Killarney

Rugosa Roses

Natives of Japan and the hardiest of our garden Roses. They are valuable for planting among shrubbery, for hedges, or for groups on a lawn. Particularly adapted for seashore planting as they thrive in almost any soil. Being sturdy in growth, the winds do not affect them as is the case with other Roses.

The hybrid Rugosas produce double flowers in various colors, and bloom throughout the season. They are attractive and ornamental in the Fall when the hips ripen. Only very light pruning is required.

50 cts. each, \$5.00 per doz.

Atropurpurea. In buds, the flowers are almost blackish-crimson; as they open they pass to maroon-crimson.
Belle Poitevine. Rose-color, double; very floriferous.
Blanc Double de Coubert. A double white Rugosa alba.
Calocarpa. Rose-color, single; very sweet.
Conrad F. Meyer. Very large flowers; clear silvery rose.
Delicata. Soft rose; double flowers of good size.
Fimbriata. White, suffused pink, with edges of petals fimbriated; sweetly perfumed; growth vigorous.
Mme. Georges Bruant. Paper white, large and double; produced in clusters. A valuable pure white decorative Rose.

Madame Chas. Worth. Rosy carmine, semi-double.
Mrs. Anthony Waterer. Deep crimson; semi-double flowers are produced in great clusters; very fragrant.
Rugosa. Crimson, single; fine for hedges or groups.
Rugosa alba. White, single; very ornamental.
Rose Apples. Flowers semi-double with large petals; pale carmine-rose. Immense clusters are produced during Summer and Fall.
Souvenir de Pierre Leperdrieux. Bright vinous-red; flowers double, produced in immense clusters.
Schneelicht. A climbing variety, with snow-white flowers; perfectly formed. A variety of great merit.

Single Hybrid Tea Roses

PERPETUAL SUMMER BLOOMERS

Since the introduction of this class of Roses, the demand has increased each year as their beautiful qualities and delightful colors become known. For cultural directions, see pages 25-28.

50 cts. each, except where noted, \$5.00 per doz.

Bardou Job. Rich crimson, shaded with black, semi-double; beautiful.
Irish Beauty. Pure white, with distinct and prominent bright golden anthers; flowers very large; very free-flowering and deliciously fragrant; a great acquisition.
Irish Brightness. Vivid crimson, shading pink at base of petals; flowering profusely in large trusses of five to ten blooms.
Irish Elegance. The raisers, Alexander Dickson & Sons, describe this variety as follows: The most charming variety of all the Single Roses we have raised. In the bud state it is bronzy orange-scarlet, expanding it assumes varied apricot hues which lend to it a peculiar charm. It is of vigorous and erect growth, branching freely, and is a profuse bloomer from early June until the end of the season. When known this Rose will create a furore. \$1.00.
Irish Glory. A most striking flower, of immense size, produced in large clusters, the very marked venation rendering the color into a lovely marbled silvery pink on the inside of the petals, making in contrast with the

golden anthers a combination beyond description, and being flamed on back of the petals with crimson. Sweetly and strongly perfumed.

Irish Harmony. Color is variable, novel and distinct; the buds are a saffron-yellow, crayoned or smeared claret; the flowers, when expanded, being creamy white, of large size; very free-flowering. A distinct and fine variety.

Irish Modesty. Delicate coral-pink suffused from base of petals with ecru; its delicate straw-colored anthers make a charming tout ensemble; the blooms are large and very plentifully produced.

Irish Pride. Ecru, suffused old rose, while the zone is of old gold; a charming combination of coloring extremely difficult to describe; flowering continuously from early Summer until late in the Autumn.

Irish Star. Rose du Barri, with rich golden stamens, and a perfectly defined star-like center, of a beautiful lemon color; the flowers are produced in great profusion; altogether a superb variety.

Lord Penzance Sweetbriar Roses

The following list was originated and raised by Lord Penzance, of England. They are in great demand as they are perfectly hardy and of vigorous growth, having luxuriant foliage. Flowers and foliage are fragrant.

Sweetbriar Roses thrive where other Roses would fail. They grow in partial shade, are suitable for borders or may be trained as climbers, if desired.

50 cts. each, \$5.00 per doz.

Amy Robsart. Deep rose. Of very vigorous habit of growth.
Anne of Geierstein. Dark crimson. A superb sort.
Brenda. Maiden's blush or peach. Of unusual beauty.
Catherine Seyton. Soft rosy pink; very free-flowering.
Edith Bellenden. Pale rose. A beautiful tint.
Flora M'Ivor. Pure white, blushed with rose.
Green Mantle. Bright rich pink, with a band of white.
Jeannie Deans. Semi-double; very large scarlet-crimson.

Julie Mannerling. Soft pearly or porcelain-pink.
Lady Penzance. Beautiful soft tint of copper.
Lord Penzance. Soft shade of fawn or ecru.
Lucy Ashton. White blooms, with pink edges.
Meg Merrilies. Gorgeous crimson; very free-flowering.
Minna. White, opening with a tint of palest blush.
Rose Bradwardine. Clear rose.
Lucy Bertram. Deep crimson, center pure white.

Practical Directions for Amateur Rose Growers

The following cultural directions will be of practical value to amateurs who may have but limited knowledge as to the cultivation of hardy garden Roses. The professional gardener needs no directions, and this is intended to assist those wishing to grow Roses but not having sufficient practical knowledge to cultivate them successfully.

One of the first essentials is location. The best position for Roses is a southeast to southwest exposure. Roses require sunshine. They should be kept from the shade and roots of trees. They will not thrive in the shade, neither will they thrive where the roots of trees come in contact with the Rose-bed and rob the soil of the nourishment which is intended for the Rose plants. Roses like to be sheltered from the north and northwest winds. A shelter may be afforded by planting screens of Rambler Roses; these are effective and ornamental, and also answer the purpose of a wind-break.

The Soil. Roses will grow in ordinary garden soil well enriched with decomposed stable manure, cow manure being preferable where the soil is not too heavy or of clay composition. If of the latter composition, then horse manure should be used. Roses will not thrive in sand, neither will they grow in ground which is stagnant.

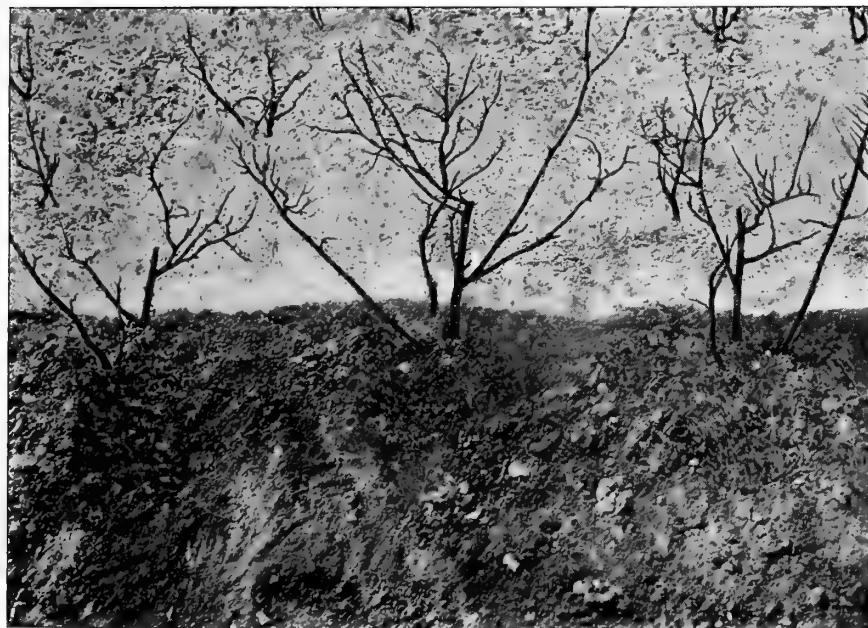

The bed should have good drainage; this is important. If the place selected for growing Roses is sand, this should be removed to the depth of at least two feet, replacing the same with good turfy loam from some old pasture, or with soil which has not been exhausted by over-cropping, adding one-fourth the quantity of well decomposed manure, thoroughly incorporating the manure with the soil from bottom to top. A layer of turf on the bottom is beneficial, as it serves as drainage.

Should the soil, on the other hand, prove to be clay, where Roses are to grow, this should be removed to the depth of 2 feet, and one-half loam and one-half of the clay soil, together with one-fourth of decomposed manure, should be thoroughly mixed. Before filling in the bed with this compost, 4 or 5 inches of broken bricks or small cobblestones should be used for drainage. Clay soil is retentive and holds an excess of moisture for Roses to thrive without drainage.

Hybrid perpetual Roses require a stronger or heavier soil for their successful growth than hybrid teas. Hy-

Walsh's Roses in Summertime

The same bushes hilled-up for winter protection

Walsh's Handbook of Roses

CULTURAL DIRECTIONS—Continued

brid teas require a lighter soil; by that is meant soil of a more sandy texture but well and liberally enriched with manure as stated before. These should receive careful attention as regards watering, as the evaporation will be greater in light soil than in heavier soil.

Rambler Roses will grow in ordinary soil well enriched with manure, digging to a depth of at least 2 feet and thoroughly incorporating the manure in the soil.

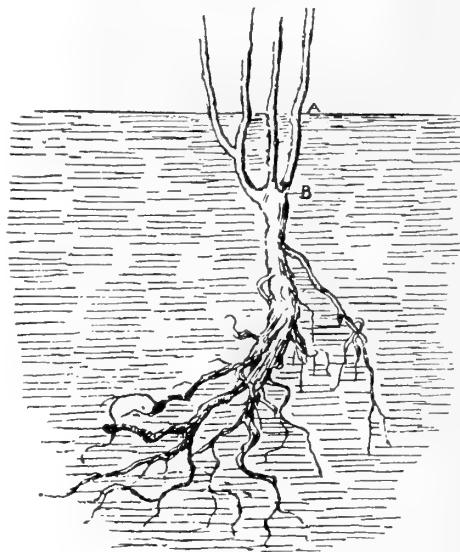

It is probably the fact that a great number of the cases of failure on the part of amateurs with the Rose might be traced to lack of nourishment in the soil. Where there is this lack the plants will look poorly, the foliage will wither, apparently, and the blooms, if indeed there be any, will be small, and eventually the plant will die. Put a Rose in a hole and you may expect it to die; but plant it with care in properly prepared soil, and it will thrive and give satisfaction and pleasure. To repeat once more, have plenty of manure in your bed, and be particular to get good drainage and you have made a start that cannot fail to ensure you a degree of success later on that will surprise and gratify.

THE PLANTING of Roses may be done in October and early November, before the ground freezes. A maxim that you will do well to remember, is, "Begin well, make the foundation safe, and you may hope to prosper." When planting Roses, dig a good large hole, and deep. Spread out the roots evenly over the bottom; take hold of the plant when filling in the soil and shake lightly so the soil will set evenly about the roots. When the hole is nearly filled tread the soil firmly with the foot. This is to exclude all air spaces that may possibly be in the soil unless planted firmly. When planting budded Roses, plant 2 inches below the collar or bud; that is, where the Rose is united to the stock. This is beneficial, as by planting 2 or 3 inches below the surface, new roots are produced from the base of the Rose, thereby giving it increased vigor and strength. On the accompanying illustration, B shows the collar of plant, which should be 2 inches below surface; A shows plant finally set.

Budded plants produce superior growth to plants grown on own roots. There are so few varieties that thrive well on own roots; the majority of Rose plants are budded. Budded plants make more growth in one year than own-root plants in two or three years.

The only additional care required is to remove any shoots commonly called "suckers," which spring up from the base of the plant. A person soon becomes familiar with the so-called briar sucker, as it has seven to nine petioles to the leaf, see illustration herewith, whereas the Rose, except in few instances, has but five. There is also a distinction in the color of the briar of the Rose proper, easily detected when a person becomes familiar with the plants.

When planting is finished, a good soaking of water would be beneficial, should the ground be dry. The distance for planting Roses may be varied according to the space at command or the size of the bed contemplated. The distance apart may be 18 by 24 inches, or 24 by 24, depending on the variety, as some require a little more space than others. For Winter protection draw the earth up around the base of the plant to a depth of 8 inches, similar to hilling up potatoes. See illustration of page 25, showing Roses before and after hilling up. This will shed the water and keep the base of the plant in good condition during the Winter. It is not the very low temperature so much as the moisture which causes greatest injury

Showing how deep plants should be set

CULTURAL DIRECTIONS—Continued

to the plant. After the earth has been drawn up as above, spread over the surface 4 or 5 inches of coarse litter or coarse manure. This will answer two purposes; it serves as protection, as well as fertilizer. Where evergreen branches can readily be obtained, it is an excellent plan to place these over and around the Rose bushes. This will furnish shade from the sun in February and early March, which sometimes proves injurious, exciting the sap into premature action. This same method will also apply to Hybrid Teas, and when possible cover with branches or coarse litter 3 or 4 inches higher than Hybrid Perpetuals.

PRUNING. Pruning should be done early in the Spring as soon as the frost is out of the ground. When pruning, cut out all the old wood; by that is meant wood which flowered last year, leaving from three to six of the strongest shoots of last year's growth and cutting these back to within 8 to 12 inches from the ground. The stronger growing shoots should be cut to about 12 inches and the weaker growing shoots to about 8. This depends entirely on the habit of growth. The principle of pruning is not generally understood, and people do not prune severe enough to obtain best results. This applies to hybrid perpetuals.

PRUNING HYBRID TEAS. These should be pruned lightly, cutting out the dead wood and weak shoots and shortening the shoots from 4 to 6 inches, leaving, of course, the strongest shoots to produce blooms.

RAMBLER OR CLIMBING ROSES. Remove the dead shoots and thin out the tall shoots when necessary to within about 3 inches of the base, necessary to within about 3 inches of the base.

This method will also apply to Austrian Roses. Rugosa Roses may be pruned to suit location, height, etc., and for the purpose desired. An important requisite is hoeing or cultivation of the ground. This ground should be hoed or loosened up at least once a week after the Rose begins to grow. Do not wait to do this until you see weeds growing. The stirring or hoeing of the soil is beneficial as it permits the nitrogen to rise to the surface and is then absorbed by the leaves of the plants. As one person expressed it, "Roses like to have the soil tickled with the hoe."

Another important point is watering. Water the plants in dry weather when there is not sufficient rain to keep the ground moist and the Roses in good growing condition. This should be done early in the morning or late in the afternoon. Roses are gross feeders and require soil liberally enriched with manure as this contains nitrogen which is absolutely necessary for their best development.

By following the above directions and with close observation, the amateur should be able to grow Roses successfully.

Mannettii Briar

To Destroy Injurious Insects which Attack Rose Bushes During the Summer

The question is often asked, "What shall I do to keep my Roses free from insects?" The following remedy the writer has found to be effective, having used it for many years. The remedies are simple, easily applied, and no injurious results are produced by their use.

One of the first enemies to attack the Roses makes its appearance as soon as the second or third leaf is formed. This slug or worm will be found inside the leaf either closed together or folded.

Hellebore dusted on the leaves early in May when the second leaf appears on the young shoot will destroy the leaf roller or slug. Usually two applications are sufficient unless washed off by the rains. When the white thrip or hopper appears, it indicates lack of moisture in the soil; this thrip will not attack the plants except in the hot, dry weather when the ground is deficient in moisture. Call into requisition the force pump or hydrant hose, syringing the bushes on the under side of the leaves. Do not wait for the elements to supply water; delays are dangerous. The best scheme is to water the plants regularly—just as regularly as you would feed animals—provided, of course, that the natural water supply is deficient.

For exterminating aphis, frequent spraying with force pump or hose will prove effective and beneficial. For mildew, sulphur dusted over the affected plants will allay this disease. For Rose or Hessian bugs hand picking is the only effectual remedy. A good preventive is to plant some small white shrub near-by, Viburnum or white Weigelas; these will attract the Rose bugs. A white flower has a peculiar attraction for them. You may have noticed how they select the white or lighter colored Rose rather than the darker colored. This bug is the most detestable and destructive pest to contend with.

M. H. WALSH, *Rose Specialist*, Woods Hole Mass.

HOLLYHOCKS

In this favorite of the old-time gardens, I offer strong-flowering plants in beautiful assortment of fourteen distinct colors. They will flower the first season after planting. There is nothing more effective for a border or shrubbery than this beautiful flower, blooming as it does about the middle of July until the middle of August, a time when it enlivens the shrubbery and borders to good advantage, as there is not an overabundance of color at that season.

Double Hollyhocks, assorted colors, \$2.00 per doz.; Single Hollyhocks, in mixed colors, \$2.00 per doz.

I cannot supply single Hollyhocks in separate colors.

PERENNIAL PHLOX

Phlox has grown in popularity within the past few years through its variety of beautiful colors, its hardiness, and its long season of blooming. It begins to bloom in July and continues until November. There are no more showy or effective perennial plants than the Phloxes. The varieties have been much improved in recent years, so we have now almost all shades of color.

Price in strong plants, \$2.50 per doz., except where noted.

Amos Perry. (New.) Rose, flushed salmon, carmine eye, with a white halo. A grand novelty, with splendid, large dense spikes. 30 cts. each.

Artaban. Dark rose and red. Grand for cutting and charming for massing.

Auricular-eyed. Flowers over an inch, rosy lilac, white star-shaped center, resembling a Cineraria. 35 cts. each.

Beatrice. Carmine. 25 cts. each.

Boule de Feu. (Ball of Fire.) Rosy red with darker center.

Cameron. White, red eye.

Carminea. (New.) Pretty salmon-rose, carmine center. Beautiful bedding sort. 25 cts. each.

Comete. Rich bright salmon. 25 cts. each.

Coquelicot. Orange-scarlet. A very brilliant variety.

Danebrog. (New.) Salmon-rose changing to white in the form of a cross, with purple eye; very early, and very quaint markings, difficult to describe. 25 cts. each.

Diadem. Pure white. Fine, dense spikes.

Eclaireur. Purplish-crimson. One of the best.

Etna. Bright fiery scarlet, with maroon center. Very vivid.

Etoile de Lyon. Purplish-red.

Eugene Scott. Porcelain-white.

Flambeau. Deep salmon. Extra large and fine.

Flocon de Neige. Pure white, with slight penciling of pink.

Floribunda. (New.) Glistening carmine, crimson eye. One of the earliest. 25 cts. each.

Frederica Souliers. Red and rose.

Frei Fraulein von Lassburg. The best white Phlox.

Jean Bart. Soft rose, cherry-red center.

Jeanne d'Arc. Pure white. Late-flowering.

Josephine Gerbeaux. White, carmine center.

Julia. (New.) White, flushed and tipped, bright rose, buds bright rose. Very conspicuous. 25 cts. each.

L'Aiglon. Rosy carmine; gigantic spikes.

L'Averniir. Red, scarlet center.

La Belle Hollandaise. Magnificent formed truss; flowers very large, glistening orange-scarlet, carmine center. 30 cts. each.

M.H. Walsh, Wood's Hole, Mass.

PERENNIAL PHLOX, Continued

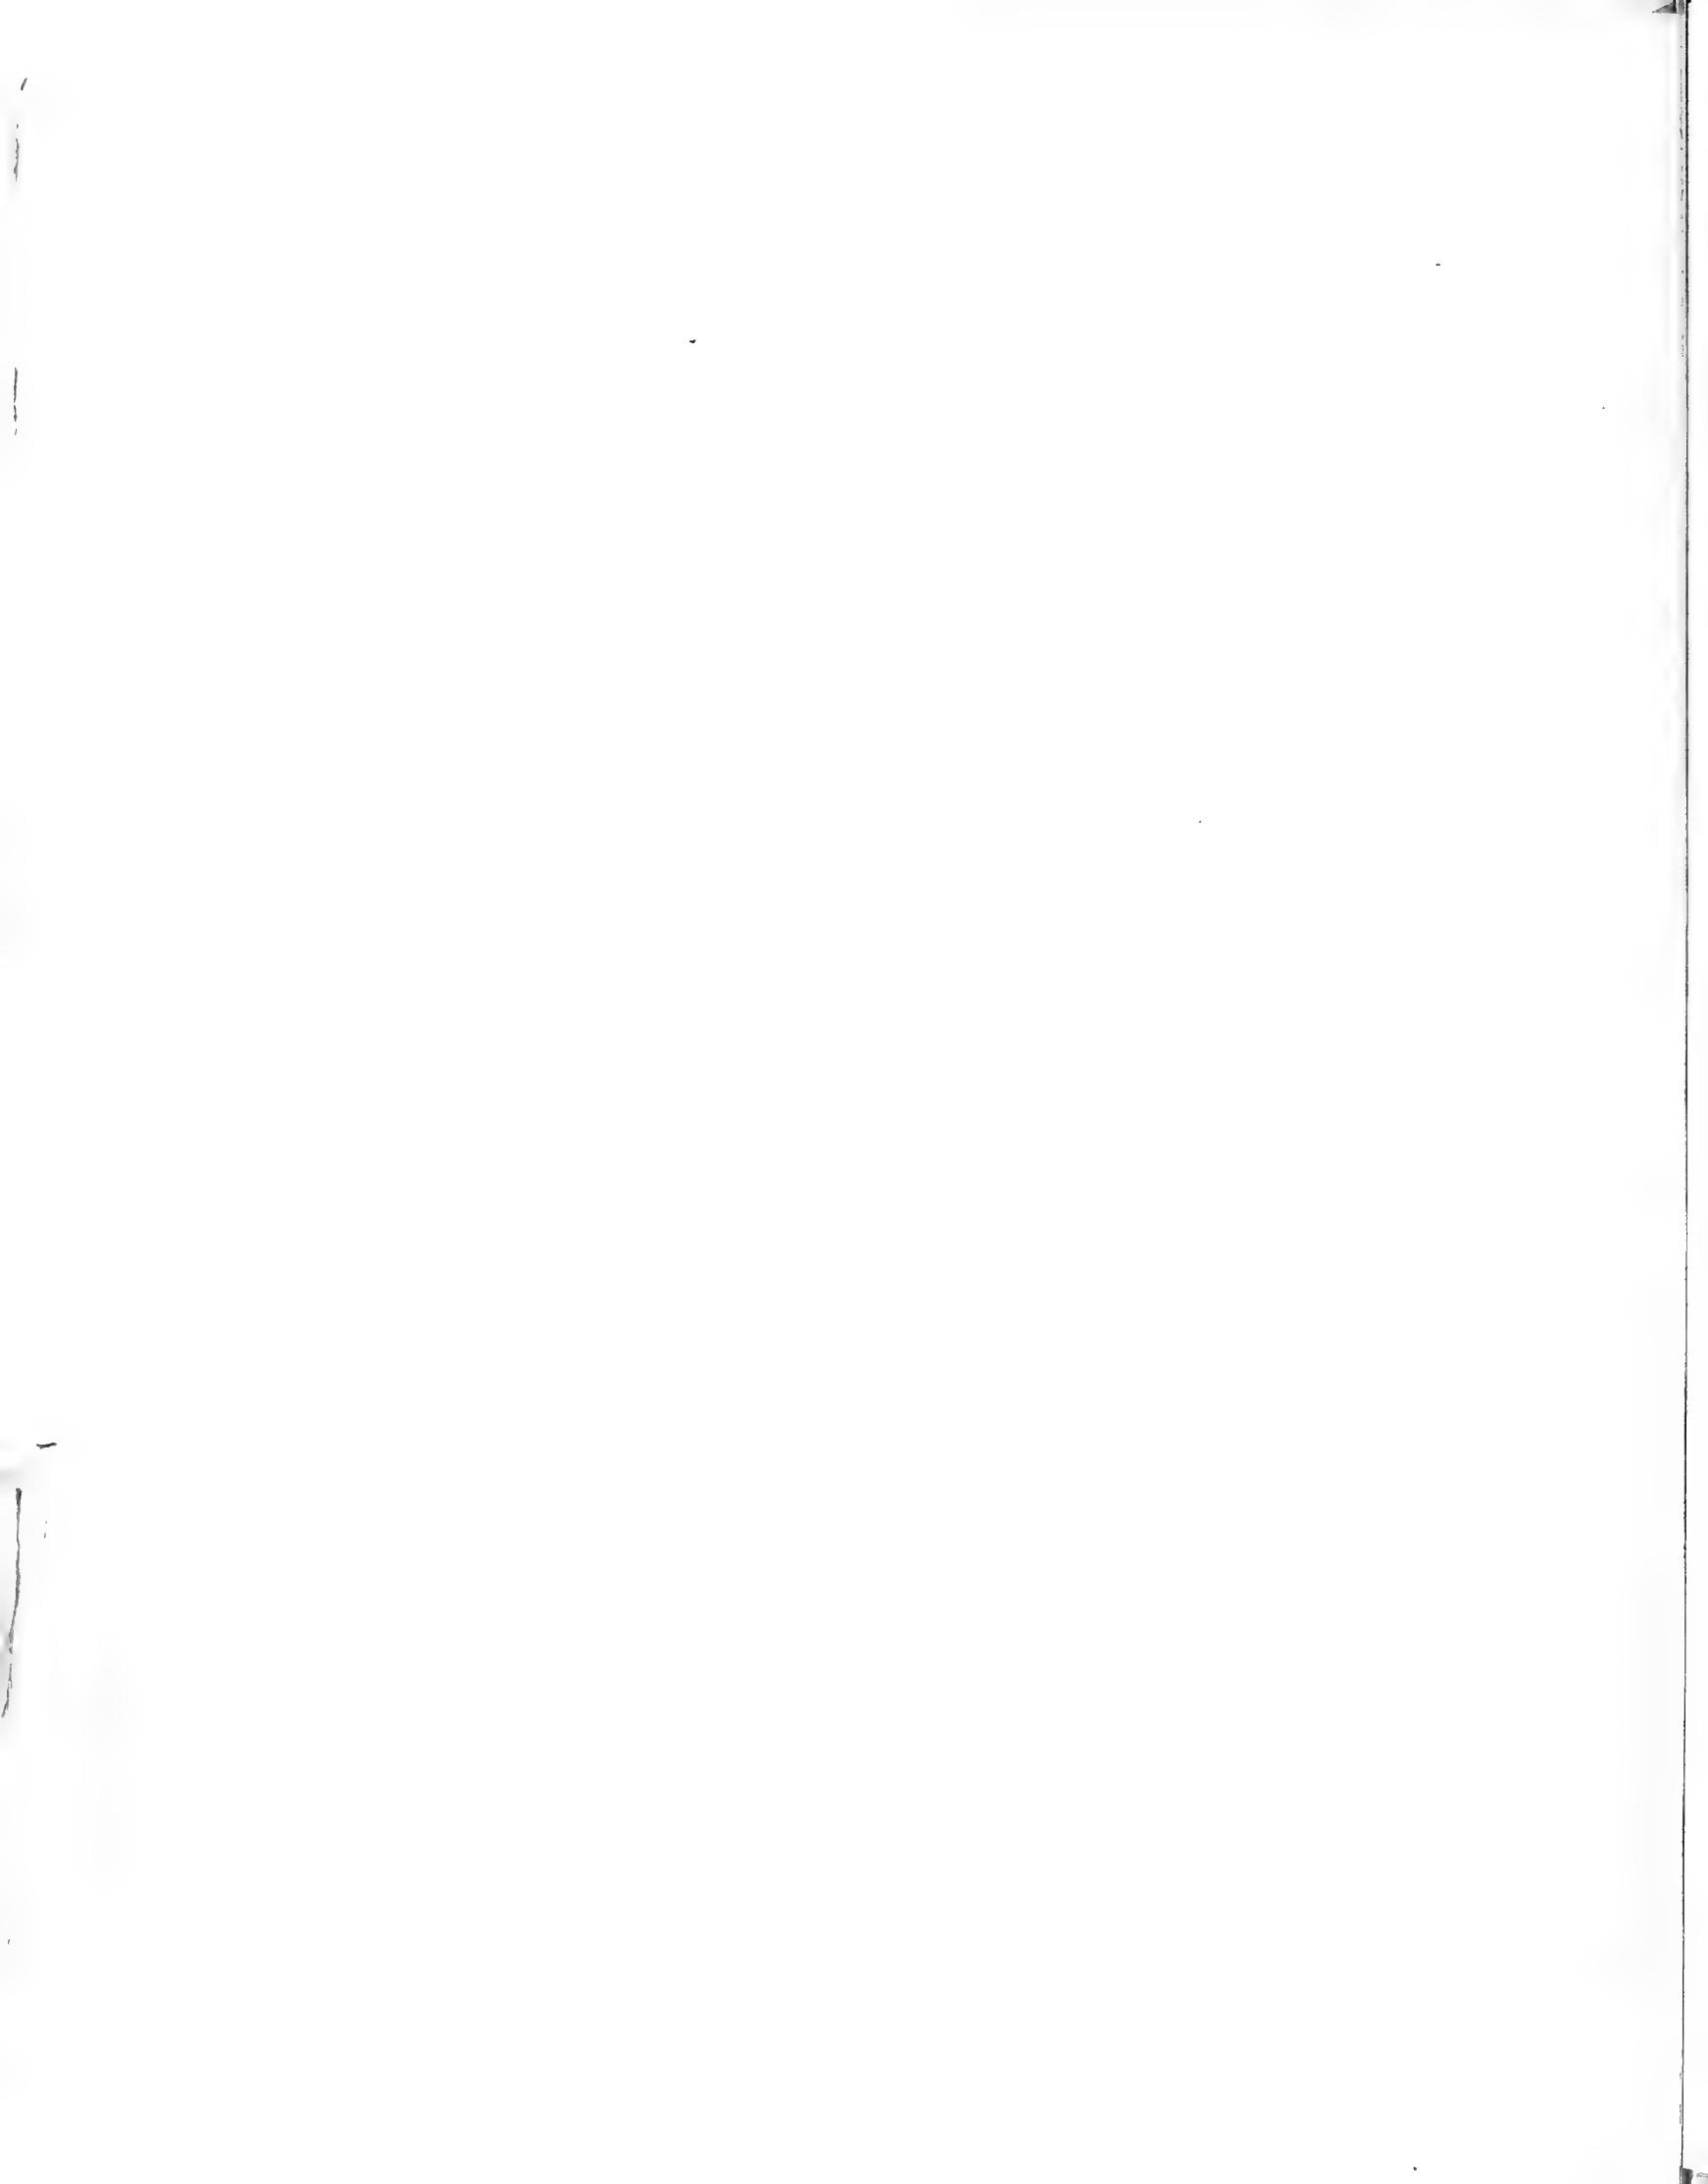

Mars. Rosy carmine, dark eye.	Roger Marx. Carmine, purple eye; very fine. 30 cts. each.
Miss Pemberton. Rosy salmon, immense flowers. 25 cts. each.	Salmonea. (New.) Immense flowers, glistening orange, carmine zone. 30 cts. each.
Meteor. Bright salmon. Good spikes and fine flowers.	Satin Rose. 25 cts. each.
Mrs. Jenkins. Pure white. Elegant trusses.	Snowdrift. (New.) Waxy white, with primrose eye. 25 cts. each.

Pantheon. Bright salmon-rose.	Talma. Enormous magenta-veined flowers. 25 cts. each.
Pecheur d'Islande. Orange-scarlet, purple eye. 25 cts. each.	Terre Neuve. Red, white striped.
Resplendens. Clear bright red.	
Reichsgraf von Hochsberg. Bright rosy red. 25 cts. each.	

DOUBLE HERBACEOUS PEONIES

In this beautiful garden plant I offer a selected stock, which contains selections from the finest varieties grown either in this country or abroad. The plants are strong and well rooted, and will, with proper care, surely give satisfaction. A bed or border of this plant is most effective, and no one will regret taking up their culture, as they are, while in bloom, a pleasure and delight to the eye.

Prices, except where noted, 50 cts. each, \$5.00 per doz.

Ambroise Verschaffelt. Rich satin-crimson; rose-scented.	Mme. Henri. Peach blossom, with prettily tessellated soft yellow center. Very unique.
Berlioz. Crimson; very large, full, globular flower.	Mme. de Vatry. Pure white, guard petals flesh; enormous flowers. 75 cts. each.
Canarie. White, tinted sulphur; very free. An elegant variety. 50 cts. each.	Mme. Ducel. Soft salmon, with silvery shadings; enormous flowers. 75 cts. each.
Carnea elegans. Clear satiny flesh; large shell-like petals; very fine. 75 cts. each.	Mme. Furtado. Carmine; center tinted salmon-rose; rose-scented; most attractive.
Carnea Triumphans. Rosy flesh, center salmon-rose.	Mme. Hulin. Clear rose, tipped silver. 75 cts. each.
Charles Toche. Satin-rose, showing golden anthers.	Mme. Lebon. Rich cerise-rose; rose-scented.
Cordalie Mathieu. Glittering crimson-rose, golden anthers.	Mme. Moreau. Pink, blush-white center.
Chiron. Cherry-red; fine flower.	Mme. Tournier. Sulphur, tipped carmine, flesh guards.
Duchesse de Theba. Pure white, tipped crimson. 75 cts. ea.	Modesty. Bright rose: Of rich, but modest beauty.
Eugene Verdier. Clear satiny flesh. 50 cts. each.	Mons. Boucharet. Vivid rose-lilac, silvery edge.
Edmond Lebon. Bright rose, silvery reflex.	Mons. Chas. Leveque. Delicate blush, passing to white; extra fine. 75 cts. each.
Etendard du Grand Homme. Brilliant cherry. A lovely variety. 50 cts. each.	Mons. Rousselton. Blush-white, center primrose; rose-scented. 75 cts. each.
Faust. Blush, center salmon-yellow. 50 cts. each.	Nivea. Pure white, center shaded carmine. 75 cts. each.
Festiva. White, center tipped carmine. 50 cts. each.	Nobilissima. Rosy lilac, shaded darker.
Festiva maxima. Pure white, large, with streaks of carmine in center. \$1.00 each.	Philomele. Satin-rose, center sulphur.
Formosa. Primrose-yellow, peach guard petal.	Picturata. Creamy white, edge dark cerise.
Jules Calot. Blush-rose. 50 cts. each.	Pottsi. Rich glittering crimson.
Lady Anna. Flesh and sulphur.	Prince Charles. Rich cerise-rose, center tinged salmon.
Lady Bramwell. Silvery rose; fragrant; grand.	Prince Charles de Salm Dyck. Rosy pink, light center.
Lady Carrington. Flesh; fragrant. \$1.00 each.	Prince Prosper. Glowing purple-carmine, golden anthers.
L'Elegante. Pink, shading to blush.	Prince Victor. Rosy pink self; very fine.
L'Esperance. Blush, speckled and striped carmine.	Prolifera superba. Pink, salmon center.
Lord Chelmsford. Rose, shaded salmon.	Reine des Roses. Full rose, strongly rose-scented.

Mme. de Guerle. Guard petals pink, center blush. A magnificent sort. 75 cts. each.	Viceroy. Bright rose-pink, center blush; fragrant.

Walsh's New Wichuraiana Rose

"Mrs. M. H. Walsh"

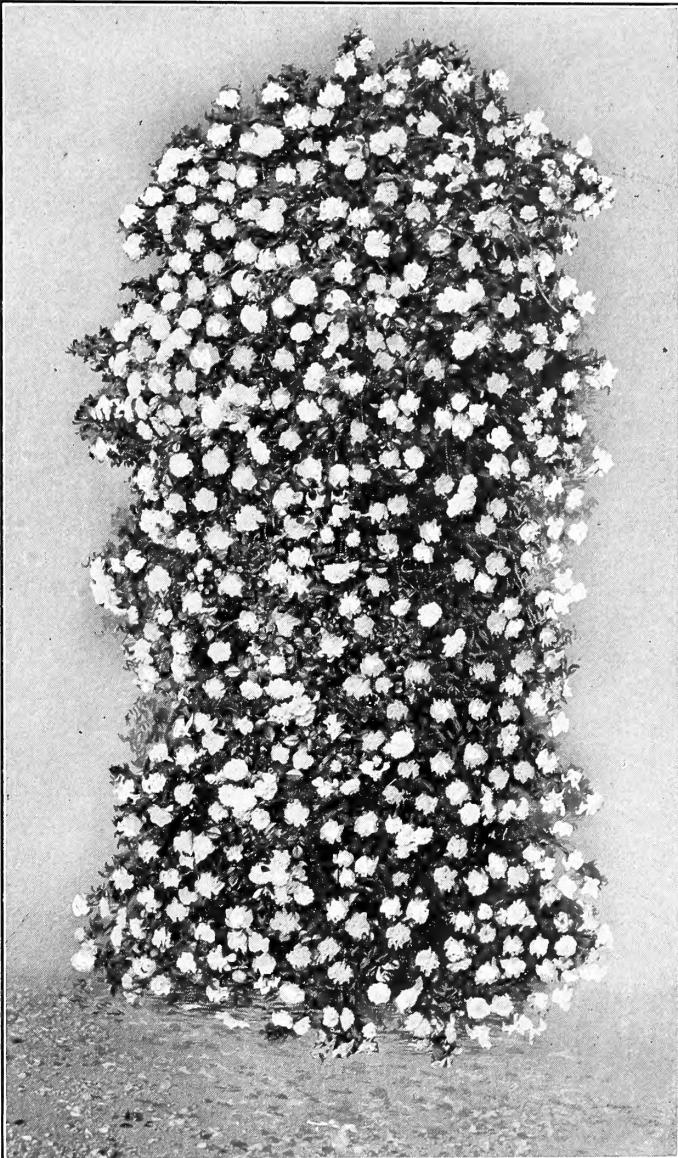

Awarded American Rose Society's Gold Medal in 1911

I take pleasure in introducing this valuable novelty to the list of my American raised or climbing Roses.

This variety combines hardiness, vigorous growth and the true characteristics of the Wichuraiana Rose, its parent. The trusses of bloom are borne in great profusion. The flower is double and nearly as large as the pink Lady Gay and is a fitting companion to it.

The color is pure snow white or a Frau Karl Druschki white, and does not fade or change to pink as do other white Ramblers, so called. This variety I consider the purest white Rambler yet produced. The foliage is very large, glossy green which is ornamental when the blooming season is past.

It is most valuable for covering banks, forming, as it does, a carpet of verdant green throughout the season. Price for strong plants in five-inch pots, \$2.50 each.

Mrs. M. H. Walsh

Novelties in Other Roses for 1912

DORMANT, FIELD-GROWN PLANTS

Carine (H. T.)

(Dickson & Sons)

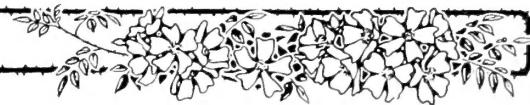

An absolutely distinct and charming Rose that attracts attention as soon as the eye lights upon it. Growth is vigorous, erect and branching, flowering in great profusion; especially valuable as a garden Rose for decorative work. The buds are long and carried on rigid stems; color, orange salmon, flesh pink, cream fawn and coppery salmon; most fascinating and unique. Price \$2.00 each.

Ferniehurst (H. T.)

(Dickson & Sons)

A superior and most chaste Rose of deep globular imbricated form. Blooms are large, full, and perfect; of upright growth; absolutely distinct, handsome foliage which is deep green. The color is a glowing, suffused, pure rosy coppery pink on fawn; a delicate sunset shade. Price \$2.00 each.

Walsh's Handbook of Roses,

Mabel Drew (H. T.)

(Dickson & Sons)

A superior Rose in every respect; it is exquisitely shaped with smooth, circular petals of great substance. Blooms are large and full. Color is deep cream in the young state, passing to intense canary yellow in the centre as the blooms develop. Price \$2.00 each.

Melody (H. T.)

(Dickson & Sons)

A charming novelty in every respect. It is very floriferous and a delightful color. Foliage rich, glossy, deep green with blooms carried on erect stems, of good size; strongly perfumed. The color is an intense pure deep saffron yellow with primrose edges; a decorative Rose of highest merit for the garden. Price \$2.00 each.

Mrs. Cornwallis West (H. T.)

(Dickson & Sons)

A grand acquisition to the everblooming class of Roses; absolutely distinct and exquisite; of large size and great substance; transparent delicate pink between a shell and a rose pink on purest white ground. Vigorous in growth and has heavy cypress green foliage, adding to the appearance of this variety as a garden Rose. Price \$2.00 each.

Leslie Holland (H. T.)

(Hugh Dickson)

Deep scarlet crimson, heavily shaded and flamed deep velvety crimson; sweetly scented. Flower is large, shell-shaped petals, lasting well when cut. Price \$2.00 each.

Lady Pirrie (H. T.)

(Hugh Dickson)

Deep coppery reddish salmon; inside of petals apricot yellow tinged with fawn copper. Ideal variety as a Rose for the garden. Price \$1.50 each.

Sunburst (H. T.)

(Pernet-Ducher)

New Yellow Rose

The color is golden orange and golden yellow, all intense shades; extremely brilliant in effect. This novelty bids fair to become the most popular of the yellow Roses for the garden. Price for strong plants, \$1.00 each.

Countess of Shaftesbury (H. T.)

(Hugh Dickson)

This pink Rose may be said to take the place with pink Roses as occupied by Frau Karl Druschki amongst the whites. It is a perfect type of hybrid Tea in habit, growth and inflorescence. The color is bright silvery carmine, mottled and flushed pale shell pink, giving a delightful Picotee effect. Price \$2.00 each.

Lady Hillingdon (Tea Rose)

(Lowe & Shawyer)

Deep apricot yellow; long pointed buds, very free flowering and sweetly scented; strong, dormant field-grown plants, \$1.00 each.

W. R. Smith (Tea Rose)

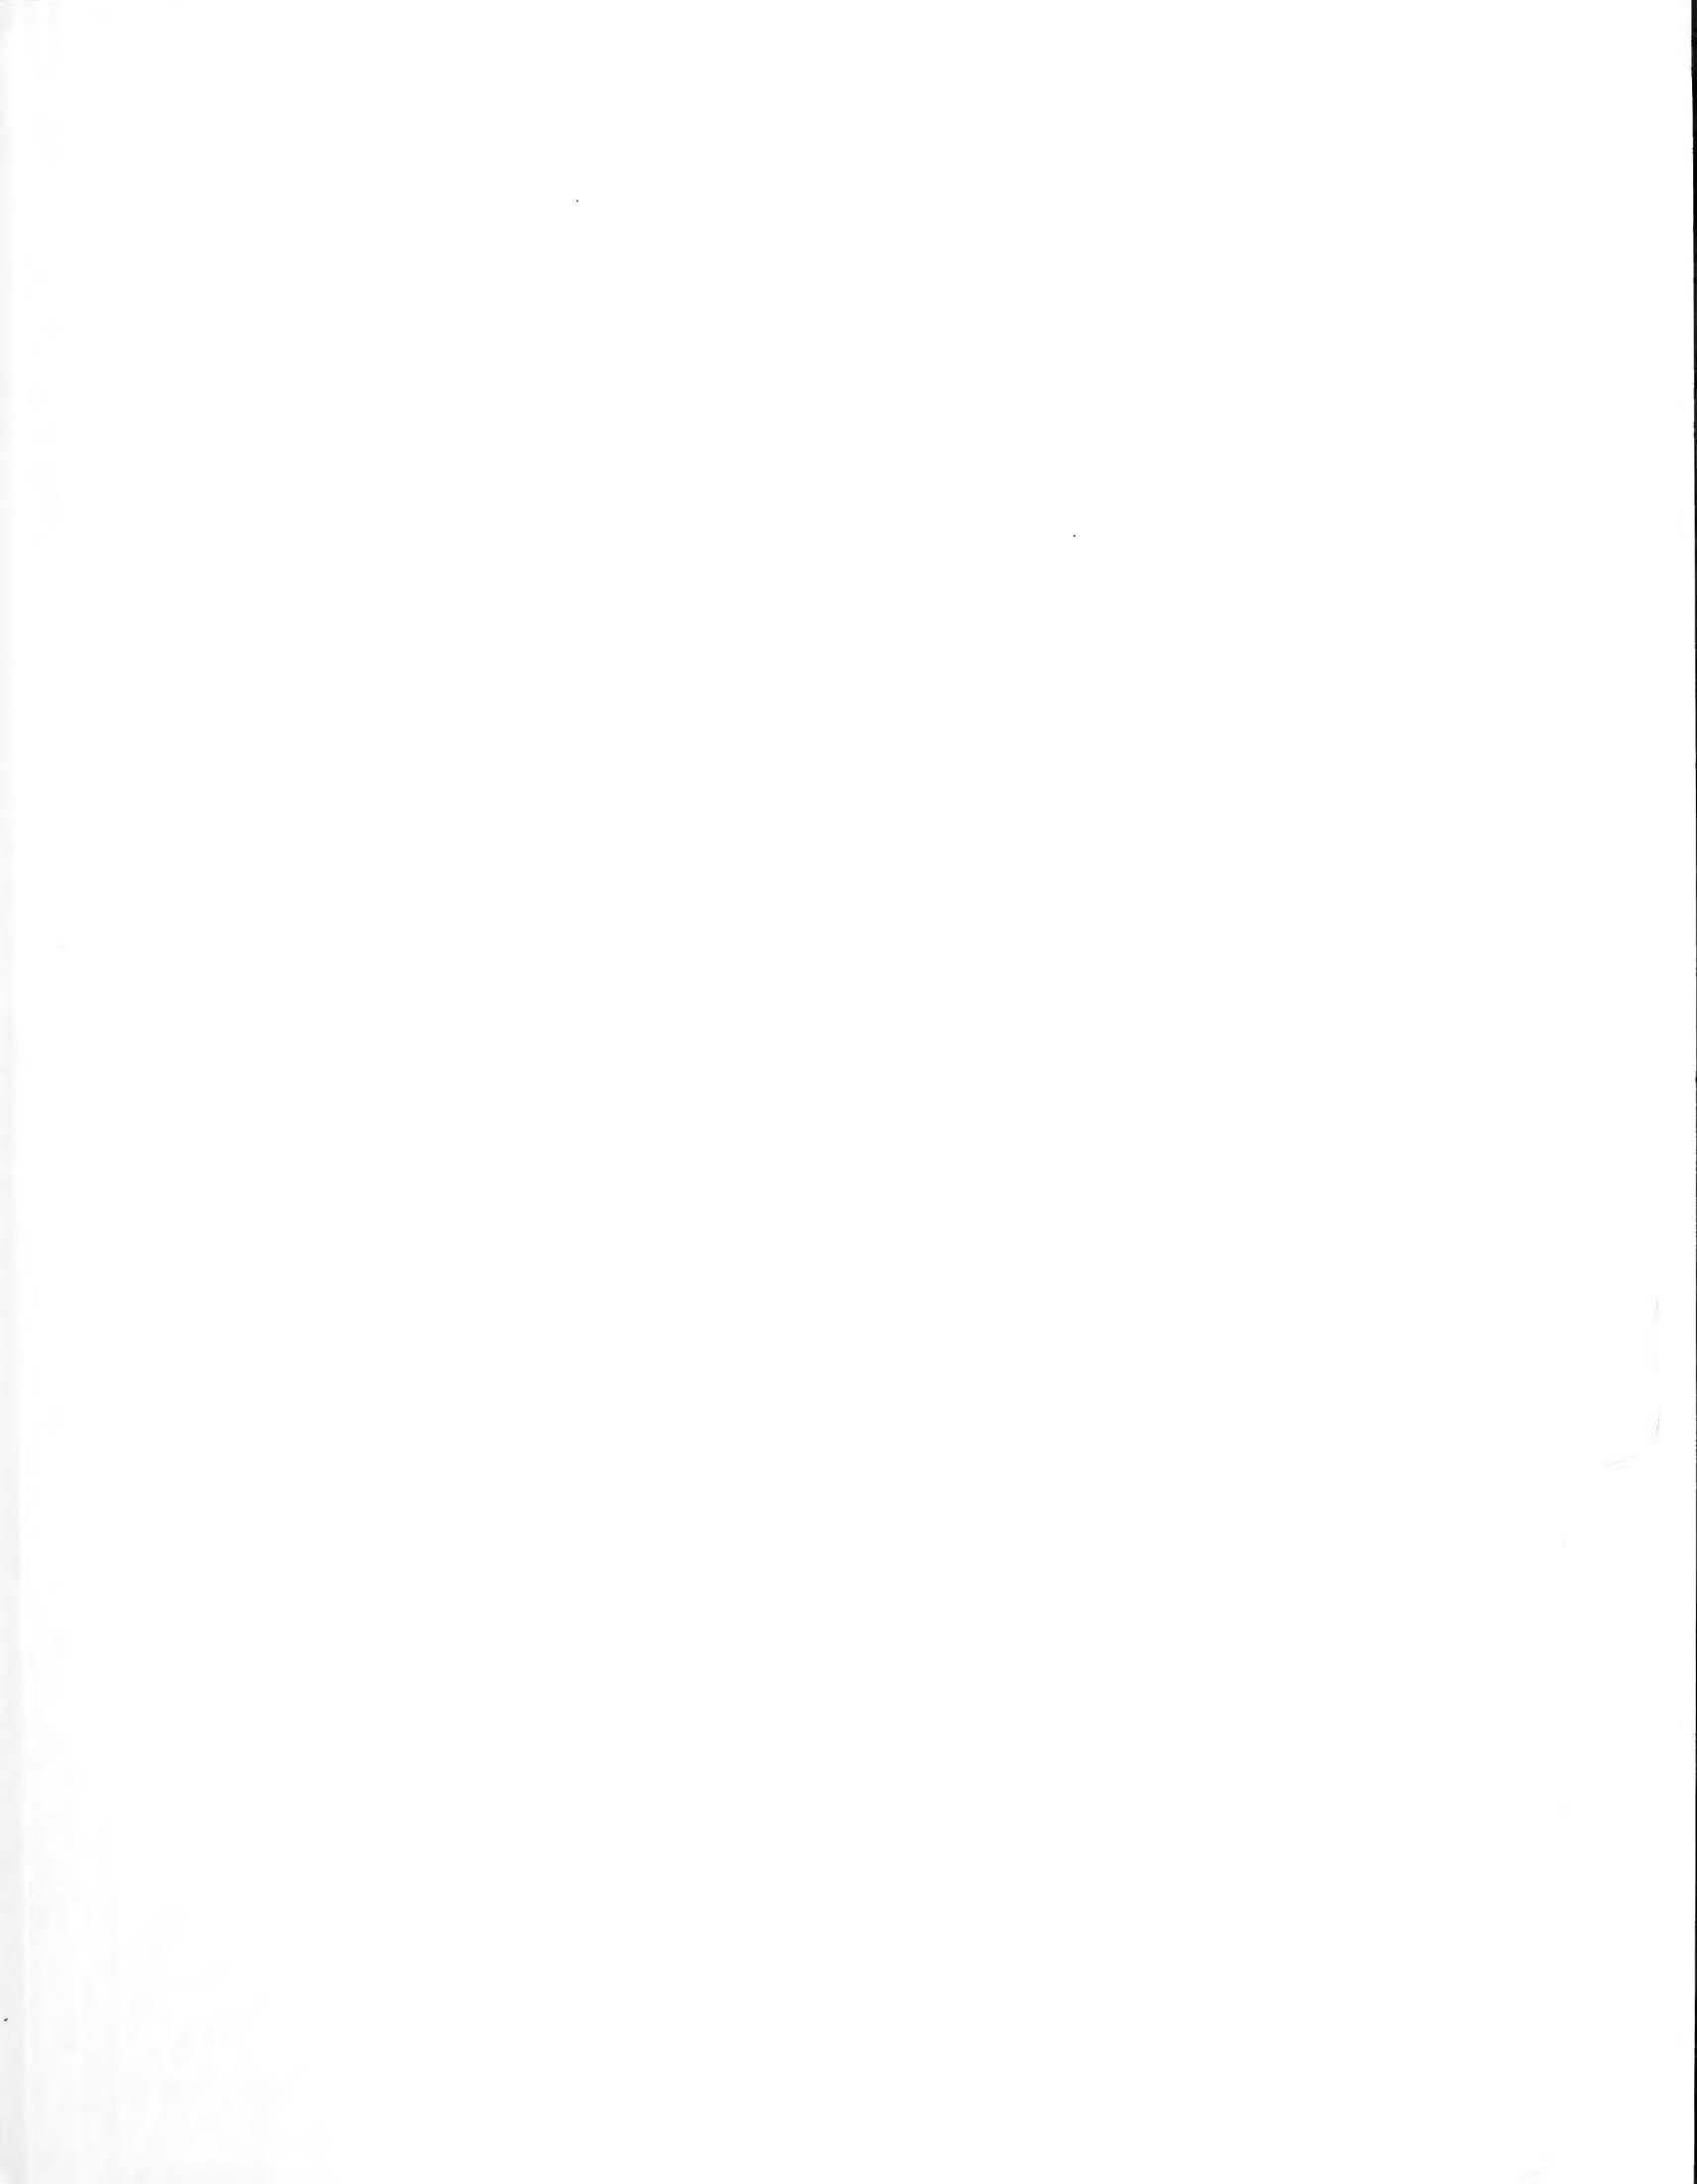

(Smith)

White, tinged blush, large and full; very free. Price 75 cts. each; \$7.50 per dozen.

New Polyantha Rose

"Orleans Rose"

Strong vigorous grower with immense trusses of bloom which are brilliant geranium red with white centre. The best of all the dwarf Polyantha Roses to date. Price 75 cts. each; \$8.00 per dozen.
